Catherine;

I did reach Kate Donohoe (the corrected spelling of her name). She's just learned that First Wind is foregoing their plans for Eastbrook and concentrating on T16. I listened and noted her concerns, explained the LURC application process, the website as a resource, and added her to the Bull Hill interested parties mailing list. She has been active in the Eastbrook ordinance process and is the closest year round resident there to the first turbine (appx. 4500 feet). She learned by our discussion that even as a town resident she would still be able to submit her comments to LURC as part of the process, etc. I have her contacts and she has mine here. I'm sure we'll here something again.

Catherine;

I've tried her several times and will do so again. Her answer machine is full and not accepting calls. I'll try also at end of day to try and catch someone home.

Don,

I returned Ms. Donahoe's call, but got not answer and I couldn't leave a message. Perhaps you can give her a try tomorrow. Her number is 565-2717. Thanks.
