Mr. Murphy, I am writing to voice my concerns for the impact the First Wind (FW) application to erect towers in TWP 16 will have on the citizens in the town of Eastbrook. The town recently completed an ordinance to address the future development of industrial and residential wind turbines in the town. The town planning board, comprehensive plan committee and many concerned citizens labored for 9 months to develop an ordinance that would help protect Eastbrook citizens from the impacts associated with the erection of industrial sized turbines in town. I have recently learned that because the towns ordinance has not been voted on yet LURC will not use that document in their decision to allow FW to erect towers in TWP 16. If FW is not required to adhere to the setback and noise levels established for Eastbrook the turbines will be placed closer to citizens not farther thereby nullifying the towns good work. Furthermore, I find it extremely disturbing that LURC will risk the safety of Eastbrook citizens for the development of industrial wind turbines. The safety of Eastbrook citizens should not be jeopardized because their ordinance has not been ratified.

Please place my name and email address on the LURC "Interested Parties List".

Sincerely,

Gary Kuhn, 2gekuhn@gmail.com
