Dear Mr. Murphy
I am Roseanna Rich
a concerned citizen of Eastbrook, Maine who has been attending town meetings in Eastbrook since January 2010 concerning the development of land ordinances that allow industrial wind.

It is not what I want for Eastbrook
I have been involved as have many other citizens in town because we are concerned that we will lose the peace that we so value in our homes.

I have many concerns that I would like to share with you regarding this gut wrenching process many of us have experienced.
And now I am writing to be included in the list of folks who wish to be informed about the proceedings in TWP 16.
I am told that some of these TWP 16 wind turbines could be closer to us in Eastbrook than the ones planned for Eastbrook!

I am unable to attend the meeting in Bangor today but wish to be included in further proceedings.

These wind turbines are not "green" and are ruining our rural communities. I have been a health care professional for 40 years and have many grave concerns about the health effects of these turbines have on humans. It is clear to me that wind turbines should not be around humans and certainly not within the guidelines of the State model ordinances. A 500 ft setback from an industrial wind turbine is injurious to human health. The Mars Hill experience is a stunning example of the damage to human health in operation. Both Drs. Pierpoint and Nussbaum have studied and reported the effects on human health and their work is being ignored by First WInd who lacks any desire to "be a good neighbor" no matter what they say publically.

I look forward to hearing from you and sharing more of my concerns with you.
Thank you for your time.
