Donald E. Murphy (Project Manager, Planning Division, Land Use Regulation Commission),

I am writing to you about First Wind's plans to build a "wind farm" in Township 16.

We live year round at 877 Sugar Hill Road in Eastbrook, and have done since 1974.

While we are not opposed in principle to wind energy, we are concerned that one of the turbine site's in Township 16 selected by First Wind is very close (a few tenths of a mile) to the Eastbrook line, which will put it less than a mile from three homes at the end of Sugar Hill Road, and only about four tenths of a mile more from five others.

In other words, that wind turbine tower would be within a mile of several homes in Eastbrook, and therefore in violation of the wind power ordinance recently passed by Eastbrook's Planning Board and currently under review by the State in Augusta (after which to be considered at an Eastbrook Town Meeting).

As far as we know, that is the only wind turbine tower planned for Township 16 which would be so close to homes in Eastbrook.

Accordingly, as you review First Wind's plan for Township 16, we ask that you require First Wind either to remove that turbine site from the project or at least to relocate it to a position where it will not be so close to homes in Eastbrook.

Thank you.

Stefan & Nancy Nadzo
