

Metal Arch Quonset Style

- Features: metal panel which usually come in a "kit" and are erected on concrete retaining walls. Arch support is derived strictly from metal panel gage and metal connections. The metal needs to be properly protected due to the corrosive salty environment.
- There are 14 municipal metal arch buildings in Maine and most were built in the late 80's and early 90's. (Two building collapsed due to snow loading in March 2001)

Metal arch, concrete foundation, bituminous paved floor
