Not sure which project he's referring to. Thought I'd send this to the three of you to cover bases. Thanks.

As a camp owner in Flagstaff Overlook, I respectfully request that you hold public hearings on all of these gargantuan projects that will disrupt the scenic beauty that is the foundation of the Maine economy and way of life. These should be located in the upper west/Midwest.

Sincerely,

Paul Averill Liebow MD FACEP

RE: Blue Sky East Grid Scale Wind Energy Development Permit Application

Dear Mr. Murphy,

Our family acquired approximately 7000 acres of land adjacent to the town of Eastbrook for the sole purpose of protecting the environment for the people who live in the community year round, seasonal residents, and for the creatures who occupy the natural habitat on the surface or in the airspace above.

We believe the despoilation of the hillside by erecting mammoth wind towers will not occur without subsidy and thus makes a mockery of creating an intelligent balance between maintaining a healthy natural habitat and serving human need. In the long run both will be degraded. Surrounding properties will be devalued, and the promised short run financial benefit will not be sustained. The only winner will be the manufacturer of the turbines and his agents. Everyone else, over time, will lose. The Carr family strongly opposes the proposed wind project and believes that a policy of conserving energy while developing an economically feasible alternative is a far better answer to meeting future need than engaging in irresponsible developments.

I request a public hearing.

Sincerely,

Oliver T. Carr, Jr.
