Mr. Murphy:
I am writing to formally request that LURC hold a public hearing on the application by Blue Sky/First Wind for a wind turbine facility in Township 16. I ask that it be scheduled at a convenient time for year-round and seasonal residents both. Everyone involved will benefit. When a multinational energy corporation wants to site a large industrial wind facility in a rural community (one that has always been rural) that depends on tourism for its economic sustenance, time must be taken to properly evaluate all that it will entail. This situation is a new one for Hancock County. We who live nearby to the proposed site remain very concerned as to what exactly will be lost and/or gained by this introduction of big industry to our rural area. Therefore I feel it is imperative that a public hearing be held by LURC on this application. Thank you for your time and consideration.
Sincerely,
Paul A. John
