Area - 182 acres

Maximum depth - 31 feet

Temperatures
  Surface - 74°F
  18 feet - 71°F

Principal Fisheries: white perch, chain pickerel

Fields Pond is a shallow, weedy pond with large populations of warmwater gamefish. Its perch and pickerel fisheries are especially popular with Maine's "younger generation" of fishermen. Many youngsters in the Bangor-Brewer have received their initiation as fishermen here.

This pond should be managed for white perch and pickerel. No stocking of any kind is recommended.

Surveyed - August, 1942
