STATE OF MAINE
DEPARTMENT OF ENVIRONMENTAL PROTECTION

PAUL R. LEPAGE
GOVERNOR

JAMES P. BROOKS
ACTING COMMISSIONER

EASTERN MAINE MEDICAL CENTER	)	**DEPARTMENT**
PENOBSCOT COUNTY	)	**FINDING OF FACT AND ORDER**
BANGOR, MAINE	)	**AIR EMISSIONS LICENSE**
A-184-71-P-M	)	

After review of the air emissions license application, staff investigation reports and other documents in the applicant's file in the Bureau of Air Quality, pursuant to 38 M.R.S.A., Section 344 and Section 590, the Department finds the following facts:

I. REGISTRATION

Eastern Maine Medical Center (EMMC), located 489 State St. in Bangor, Maine has proposed to install an Emergency Generator at their health care facility. EMMC has submitted a written request for a minor revision to extend the authorization to construct beyond the 18 months allowed for by Air Emissions License Amendment, A-184-71-O-R.

II. APPLICATION CLASSIFICATION

EMMC has submitted a letter requesting that the approval to construct, as provided by the original air emission license A-184-71-O-R, be extended for an additional 18 months beyond the date allowed for in the air emission license. There will be no increase of emissions associated with this request. Therefore, this licensing action is processed as a minor revision.

III. MINOR REVISION REQUEST

EMMC was issued Air Emissions License A-184-71-O-R on December 26, 2008, permitting the installation of Emergency Generator #5. A-184-71-O-R, states that approval to construct becomes invalid if the licensee does not commence construction within 18 months of license issuance. EMMC has experienced delays in the expansion that this generator is intended for. Therefore, EMMC has requested to extend the authorization to construct by an additional 18 months, or until December 26, 2011.

The emission control technologies that EMMC originally proposed still represent Best Available Control Technology (BACT) for the proposed generator.

EMMC is therefore granted an extension to begin construction for an additional 18 months, or until December 26, 2011.

ORDER

Based on the above Findings and subject to conditions listed below the Department concludes that the emissions from this source:

- will receive Best Practical Treatment,
- will not violate applicable emission standards, and
- will not violate applicable ambient air quality standards, or increment standards either alone or in conjunction with emissions from other sources.

Therefore the Department grants this minor revision A-184-71-P-M, subject to the conditions found in air emission license A-184-71-O-R and in addition to the following condition:

(1) EMMC is granted an extension to begin construction for an additional 18 months, or until December 26, 2011. [06-096 CMR 115]

DONE AND DATED IN AUGUSTA, MAINE THIS 7th DAY OF June, 2011.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

BY: Melanie Loyzim for
JAMES P. BROOKS, ACTING COMMISSIONER

The term of this amendment shall be concurrent with the term of Air Emission License A-184-71-O-R.
