Dear Donald, et al:

I am writing in regard to the recent application by Blue Sky East, LLC for a wind farm in Township 16.

My name is Kathleen Donohoe. I live at 963 Sugar Hill Rd, in Eastbrook. My house is the last permanent residence on the road, and the right of way to T16 runs through my property. The proposed towers in T16 will be within a mile of my house and even closer to the bulk of my acreage. A "test" photograph taken by First Wind indicated that I would see two towers from my house. There isn't any solid information about how much I will hear. I am writing to emphasize that residents of the town of Eastbrook, including myself, have exhaustively researched the effects that such and industrial project may have on the community. We finally voted on an ordinance, yet the towers proposed in TWP 16 would violate that ordinance. In addition to this, I feel that my property will be an area that will diffuse the noise as it approaches other sensitive receptors. Any future plans for the bulk of my property will potentially be affected audibly, vibrationally or visually by the towers, without any required regulation. I am writing to ask that you please consider applying the regulations from Eastbrook's newly adopted ordinance to the project in Twp 16. I am also writing to request that you provide a venue for local landowners, including summer residents, to voice our concerns in the form of a public hearing. Many of our questions have gone unanswered thus far, and this may be the only way to address them.

Included is an image of a portion of the proposed towers, and their proximity to my land. My land is depicted in the second attachment. Clearly this would be much easier to explain in person. I hope to have an opportunity to do that.

Thank you for your time and consideration.

Kathleen Donohoe
