NOTES TO FINANCIAL STATEMENTS

For purposes of the quarterly interim financial information, it is presumed that the users of the interim financial information have read or have access to the Annual Statement as of December 31, 2015. This presentation addresses only significant events occurring since the last Annual Statement.

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of Maine Community Health Options (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners' ("NAIC") *Annual Statement Instructions* and in accordance with accounting practices prescribed by the NAIC *Accounting Practices and Procedures Manual* ("NAIC SAP"), subject to any deviations prescribed or permitted by the Maine Bureau of Insurance (the "Bureau").

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the Bureau is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Health premiums are earned over the term of the related insurance policies. Unearned premium reserves are established to cover the unexpired portion of premiums written and are computed by pro rata methods for direct business. Premiums paid by subscribers prior to the effective date are recorded on the balance sheet as premiums received in advance and are subsequently credited to income as earned during the coverage period. Premium rates are subject to approval by the Bureau. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. All other costs are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

1) Short-term investments include investments with maturities of less than one year at the date of acquisition and are reported at amortized cost, which approximates fair value.
2) Investment grade bonds not backed by other loans are stated at amortized cost, with amortization calculated based on the scientific interest method, using yield to maturity.
3) The Company has no investments in common stocks.

4) The Company has no investments in preferred stocks.
5) The Company has no mortgage loans on real estate.
6) The Company has no investments in loan-backed securities.
7) The Company has no investments in subsidiaries, controlled and affiliated entities.
8) The Company has no investments in joint ventures, partnerships or limited liability companies.
9) The Company has no derivative instruments.
10) The Company does not currently carry a premium deficiency reserve; therefore use of anticipated investment income as a factor in the calculation is not applicable.
11) Unpaid claims and claims adjustment expenses included management's best estimate of amounts based on historical claim development patterns and certain individual case estimates. The established liability considered health benefit provisions, business practices, economic conditions and other factors that may materially affect the cost, frequency and severity of claims. Liabilities for unpaid claims and claim adjustment expenses are based on assumptions and estimates. While management believes such estimates are reasonable, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continuously reviewed and changes in estimates are incorporated into current period estimates.
12) Furniture, equipment and software are capitalized at cost for items greater than $2000. Depreciation is recorded using the straight-line method over the various assets' estimated useful lives, which range from 2 to 5 years. Expenditures for major renewals and betterments that extend the useful lives of property and equipment are capitalized, while maintenance and repairs are charged to expense as incurred.

Total liabilities at fair value	0	0	132,316,124	132,316,124

All valuations noted above employ a market approach. Level 1 valuations are based on readily determinable fair values based on quoted prices in active markets for the corresponding instruments. Level 2 valuations are inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates and credit risks) and inputs that are derived from or corroborated by observable markets. Level 3 valuations are based on the assumption that carrying value for the respective instruments approximates the exit price which would be required in order for the Company's position in these instruments to be relieved; this assumption is deemed reasonable given the short period of time that has passed to-date since the various instruments were first issued.

22. Events Subsequent

On December 31, 2015, The Company reduced incurred losses by $5.4 million in its 2015 Annual Statement and booked a $5.4 million healthcare receivable based on its best estimate of likely results from the 2016 CSR reconciliation. By June 3, 2016, the Company submitted to CMS the information needed to reconcile CSR Advance Payments against the final CSR Reconciliation Amount. Prior to the end of May, the Company concluded that the CSR Reconciliation Amount would exceed CSR Advance Payments by approximately $1 million, $4.4 million less than earlier reflected in its financial statements. Since the Company did not have information in its possession to correctly calculate the CSR Reconciliation Amount at the time it prepared and submitted its 2015 Annual Statement, this is an instance of a change in accounting estimate. This change in accounting estimate has been reflected in the June 30, 2016 Financials.

Subsequent events have been considered through August 12, 2016 for the statutory statements issued on August 15, 2016.

NOTES TO FINANCIAL STATEMENTS

25. Change in Incurred Claims and Claim Adjustment Expenses

Reserves as of June 30, 2016 were $70,524,255. As of June 30, 2016, $39,696,674 has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now $1,347,384 as a result of re-estimation of unpaid claims and claim adjustments expenses principally on the comprehensive line of business. Therefore there has been a $9,886,067 favorable prior year development since December 31, 2015 to June 30, 2016. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims.
