Physical Characteristics

Area - 361 acres
Maximum depth - 32 feet

Temperatures
Surface - 76° F.
22 feet - 53° F.
30 feet - 47° F.

Principal Fishery: White perch, yellow perch

Upper Patten Pond should be managed for its existing warmwater fish populations. Although there is some cold water present, the great majority of it is deficient in dissolved oxygen. At one time, the pond was stocked with brown trout. An occasional salmon, brook trout or brown may still be crealed.

Surveyed - August, 1942
