Clifton Twp., Penobscot Co.
U.S.G.S. Orono, Me.

Fishes

White sucker	Banded killifish
Minnnows	Ninespine stickleback
Golden shiner	
Creek chub	
Pearl dace	

Physical Characteristics

Area - 15 acres	Temperatures
	Surface - 67° F.
Maximum depth - 3 feet	3 feet - 63° F.

Principal Fishery: Bait fish

Little Burnt Pond is located adjacent to the road into the Bangor Water District pumping station on Floods Pond. The road is reached via Route 180, but it is closed to public access.

The pond's shoreline is very rocky. Surrounding woodlands are mixed hardwoods and softwoods. The pond has a mud bottom and is very weedy.

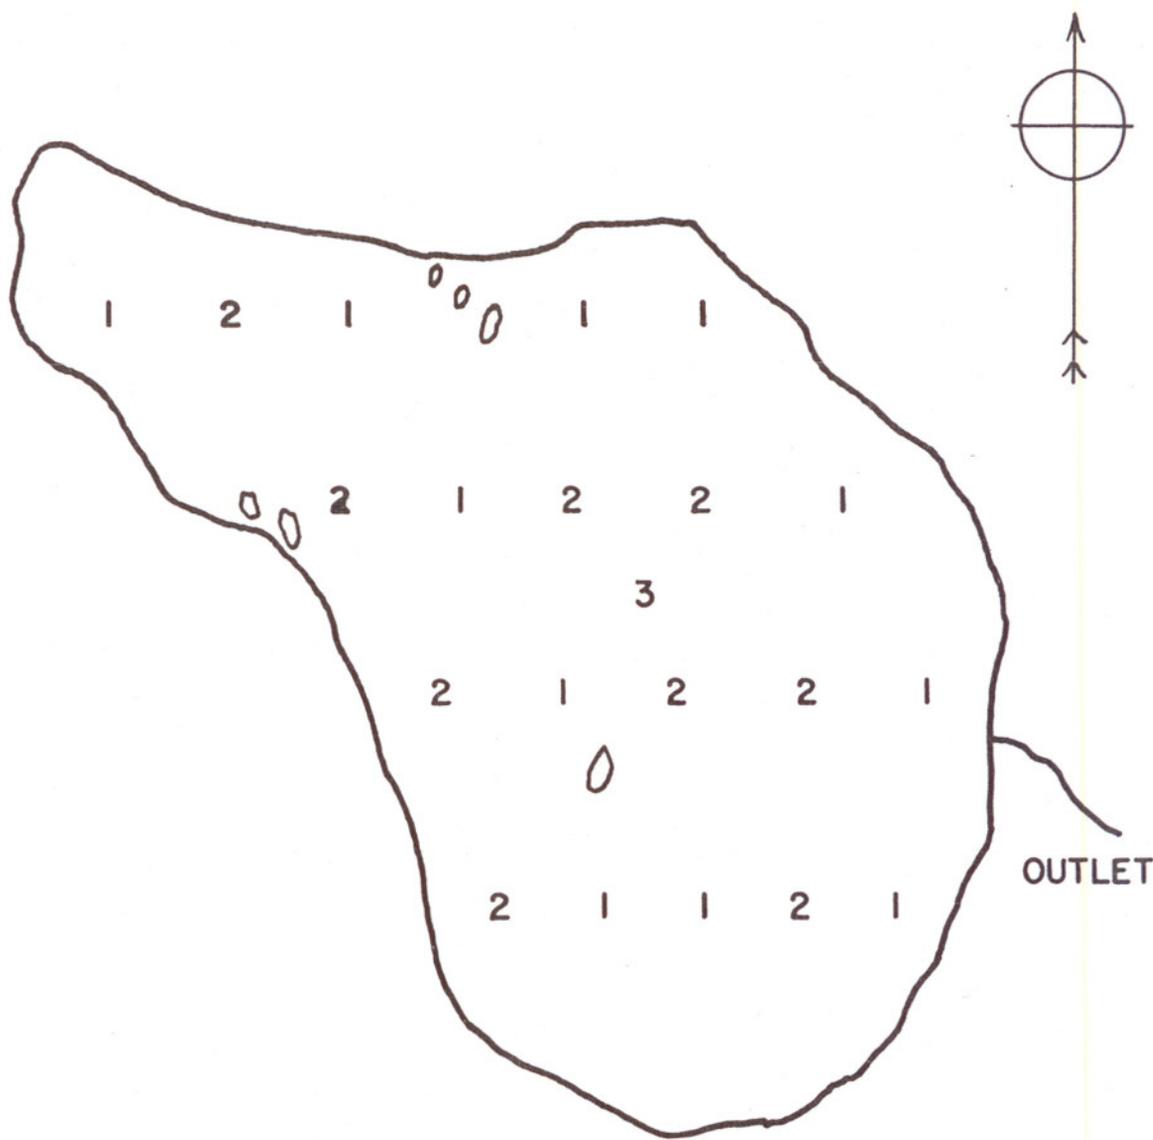

The pond should be managed for bait fish. The introduction and stocking of other fishes is not recommended.

Surveyed - 1973

Maine Department of Inland Fisheries and Game
