

# HERMON POND

Hermon Twp., Penobscot County  
U.S.G.S. Hermon, Maine

## Fishes

Brook trout	Common shiner
Rainbow smelt	Creek chub
Smallmouth bass	Fallfish
Largemouth bass	White sucker
White perch	Hornpout (bullhead)
Yellow perch	Banded killifish
Chain pickerel	Pumpkinseed sunfish
Minnnows	Black crappie
Golden shiner	American eel

## Physical Characteristics

Area - 461 acres

Maximum depth - 17 feet

Temperatures:

Surface - 73<sup>0</sup>F

16 feet - 67<sup>0</sup>F

Principal fisheries: Largemouth bass, smallmouth bass, black crappie, white perch, chain pickerel

Hermon Pond is a shallow warm water pond best managed for the abundant populations of warmwater sport fish. Black crappie were first reported in 1990, and largemouth bass were discovered in 1994. The black crappie fishery has now blossomed into a good fishery and has become very popular among local anglers. The largemouth bass fishery has yet to fully develop. Because of the large numbers of forage species and good largemouth bass habitat the population should thrive. It should be noted that without adequate removal the bass population could become stunted.

There are two boat launch facilities on Hermon Pond; one is located on the west shore and the other on the opposite east side.

Surveyed - August, 1957

Revised - 2000
