

ROUND POND
T3 R1 and Lee Twp., Penobscot Co.
U.S.G.S. Springfield, Me.

Fishes

Brook trout (squaretail)

Chain pickerel

Physical Characteristics

Area - 10 acres

Temperatures

Surface - 73° F.

Maximum depth - 29 feet

28 feet - 51° F.

Round Pond is a typical, small, kettlehole pond in a scenic setting of spruce and white birch. To get there, take the Weir Pond road from Rt. 6, the Lincoln-Topsfield road. There is a boat landing.

Brook trout grow well in Round Pond. Apparently the only other species established is pickerel and they appear to be doing poorly in this cold pond. Periodic stocking will be necessary to support the trout fishery.

To protect against the introduction of additional fish that would compete for food and space with trout, we recommend that use or possession of live fish as bait be prohibited. We also recommend closure of Round Pond to ice fishing.

Surveyed - August, 1961
