

ROBINSON POND

Caratunk, Somerset County
U.S.G.S. Catatunk, Maine (7½')

Fishes

Brook trout
Minnows
Lake chub

Finescale dace
Fathead minnow
White sucker

Physical Characteristics

Area - 40 acres

Maximum depth - 18 feet

Principal fishery: Brook trout

Temperatures:

Surface - 81°F

18 feet - 46°F

Robinson Pond is located south of Moxie Mountain. It has a small inlet from Doughnut Pond to the south and its outlet flows northeast into Pleasant Pond Stream. The pond's shoreline is mostly undeveloped.

Water quality in Robinson Pond is good for coldwater gamefish. A natural population of brook trout is maintained by spawning along the shoreline and in the inlet. Other species present in the pond compete with the trout, which suppresses growth and survival. The pond is not stocked.

Robinson Pond is accessible via gravel logging roads off Routes 16 or 201. The pond is open to fishing with artificial lures only in the summer and closed to ice fishing.

Surveyed - July, 1972
