Common shiner	

Physical Characteristics

Area - 223 acres

Maximum depth - 44 feet

Temperatures:

Surface - 77⁰F
44 feet - 46⁰F

Principal fishery: Smallmouth bass, largemouth bass, chain pickerel, white perch

Coleman Pond provides ideal habitat for warm water fish species. Largemouth bass were introduced by the Department in 1992 and 1994 to utilize available habitat and to provide a fishery.

In more recent years Coleman Pond has received more winter fishing activity than summer. A very good white perch fishery exists.

No coldwater species should be stocked.

Surveyed - July, 1955

Revised - 1998
