Chain pickerel

Hornpout (bullhead)

Physical Characteristics

Area - 11 acres

Temperatures

Surface - 78° F.

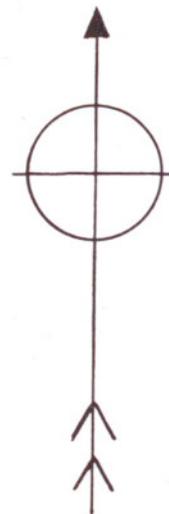

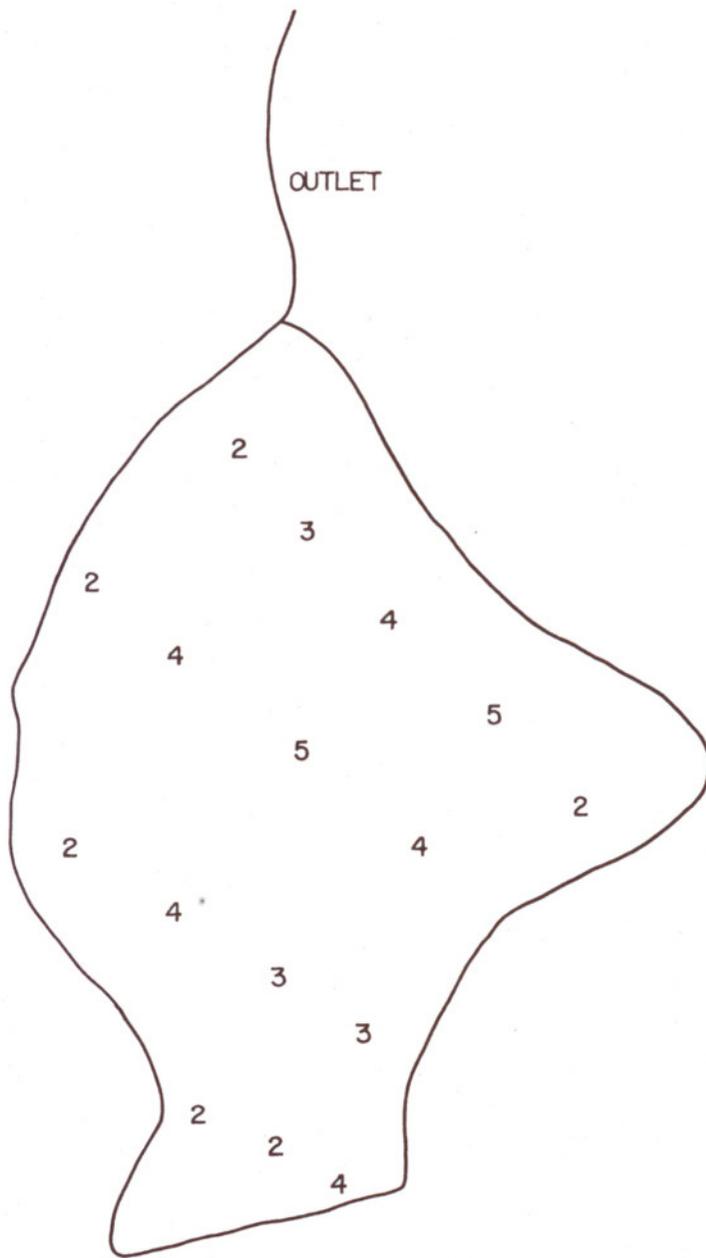

Maximum depth - 5 feet

5 feet - 71° F.

Suggested Management

Barren Pond is extremely shallow. Except for one relatively cool spring seepage area near the outlet, the entire water area attains high temperatures during the summer months. The hornpout is the dominant species. Pickerel are scarce.

Management should emphasize the hornpout at the present time.
