

STATE OF MAINE

Foundation/Certified

Seed

Potatoes

As determined by the

Florida Test

2007- 2008

The readings in the Foundation List do not exceed tolerances for Maine Foundation Seed Potatoes. (0.5% total virus and produced on farms where no Ring Rot was found in 2007.) Included in this book are those seed lots that met the tolerances for Maine Certified Seed Potatoes.

* For grow out only

The purpose of this table is to express equivalency of terms used by various certification agencies for seed potatoes harvested from a series of successive field plantings. For specific criteria relating to disease tolerances and other requirements, the reader is referred to the certification regulations of the agency in question.

The first field planting utilizes laboratory-tested stocks which may be tissue-cultured plantlets, greenhouse-produced minitubers, stem cuttings, or line selections. Contact agencies for details as to types of stocks planted in their programs.

Term used by agency to seed potatoes for a particular year in the field: C = certified, E = elite, F = foundation, G = generation, N = nuclear, PE = pre-elite.

If lots originate at Corneell-Uihlein Farm, the first three generations (G1-G3) are also designated by a "U" to denote source.

2007/08 Florida Samples With Readings Not Exceeding Tolerances for Maine Foundation/Certified Seed Potatoes

Test Samples:

The Department of Agriculture, Food and Rural Resources has no knowledge of the way in which the samples were obtained. All samples tested were collected by the grower and it is assumed that they were taken in a recommended manner.

The percentage of disease reported is based upon the number of plants growing in Florida. Samples where no diseases plants were observed does not mean that the seed is free of disease or disease causing agents, or varietal mixture, but that none was found during inspection.

Maine Foundation Seed Potatoes, in addition to meeting the requirements of this test, must meet all of the requirements for certified seed and must be graded for shipment to meet one of the official grades for Maine Certified Seed Potatoes.

Bacterial Ring Rot:

This Post-Harvest test in itself is not designed to detect the presence or absence of the disease, Bacterial Ring Rot. The samples used are not large enough and the techniques used in these evaluations are not intended to be a check for this disease. It should be pointed out, however, that in order for a seed grower to sell Foundation Seed his entire operation must be free from Ring Rot. This ruling offers the buyer of Foundation Seed some additional protection against this disease.

The # symbol printed after the generation number of a seed potato lot in this directory denotes said seed potato lot passed all the requirements of the Maine Seed Potato Certification Program but was produced on a farming operation on which Bacterial Ring Rot was detected in 2007.

Protected Varieties:

Varieties of seed potatoes with a (P) after their names are protected by patent or are otherwise not released to the public, and such varieties may only be certified if the applicant for certification provides authorization to propagate the variety by the patent holder or, if there is no patent, the registered breeder.

Seed Class:

The last column on the variety listing pages indicates the seed class:

- F = Foundation - Total virus is 0.55% or less
- F/C = entered as Foundation Seed but only meets Certified - Total virus is 0.56% to 5%
- C = Certified - Total virus is 5% or less

Averaging Samples:

The "@" sign before "No. of acres" indicates that this data is an average of two or more tests.

Emergence:

If the Florida Test emergence count was less than 200, the certification in these instances will be based upon 2007 summer field inspection. If the sample was entered as Foundation, but the summer field reading was higher than 0.55% total virus, then the sample only qualifies for Certified Seed, which is shown under the Seed Class section as F/C.

Generation Designations used in this booklet:

Prefix to Generation number: G - Generation, N - Nuclear
 Suffix to Generation number:

- | | |
|------------------------------|----------------------------|
| AB - Alberta | NB - New Brunswick |
| AK - Alaska | ND - North Dakota |
| BC - British Columbia | NE - Nebraska |
| CA - California | NY - New York |
| CO - Colorado | PA - Pennsylvania |
| FL - Florida | PEI - Prince Edward Island |
| MAN - Manitoba | QU - Quebec |
| ME - Maine Seed Potato Board | SK - Saskatchewan |
| MI - Michigan | WV - West Virginia |
| MN - Minnesota | WI - Wisconsin |
| MT - Montana | |

Field Generations for Seed Potato Shipments:

The Potato Association of America recommended that North American Seed Potato Certification programs use a uniform Generation designation in addition to their regular Generation designation. The designation "FG", which stands for "Field Generation", has been added to the regular generation designation on tags and bulk certificates. "Field Generation" represents the number of years the seed has been produced in the soil. See the following examples:

- | | | |
|----|---|----------------|
| N1 | = | FG1 |
| N2 | = | FG2 |
| N3 | = | FG3 |
| N4 | = | FG4 |
| G1 | = | FG5 |
| G2 | = | FG6 |
| G3 | = | FG7 (Grow out) |

SUMMARY OF FLORIDA TEST RESULTS (1998-2007)

Year	No. of Samples	Acreage Tested	Percentage of Acreage in each category

***** **IMPORTANT NOTICE** *****

Bacterial Ring Rot (#):

The # symbol printed after the generation number of a seed potato lot in this directory denotes said seed potato lot passed all the requirements of the Maine Seed Potato Certification Program but was produced on a farming operation on which Bacterial Ring Rot was detected in 2007.

Protected Varieties (P):

Varieties of seed potatoes which have a (P) after their name are protected by patent or are otherwise not released to the public, and such varieties may only be certified if the applicant for certification provides authorization to propagate the variety by the patent holder or, if there is no patent, the registered breeder.

LAST NAME	FIRST NAME	TOWN	ACRES	CERT#	GEN#	NO. OF PLANTS	% LR	% MOS	% MIX	Seed Class
-----------	------------	------	-------	-------	------	---------------	------	-------	-------	------------

Seed Class: F = Foundation - Total virus is .55% or less F/C = entered as Foundation Seed but only meets Certified - Total virus is .56% to 5%
C = Certified - Total virus is .56% to 5%

Protected Varieties: Varieties of seed potatoes with a (P) after their names are protected by patent or are otherwise not released to the public, and such varieties may only be certified if the applicant for certification provides authorization to propagate the variety by the patent holder or, if there is no patent, the registered breeder.

Emergence: If plant emergence count was less than 200, the Certification is based upon the 2007 summer field inspection. If the sample was entered as Foundation, but the summer field reading was higher than 0.55% total virus, then the sample only qualifies for Certified Seed, which is shown under the Seed Class section as F/C.

Emergence: If plant emergence count was less than 200, the Certification is based upon the 2007 summer field inspection. If the sample was entered as Foundation, but the summer field reading was higher than 0.55% total virus, then the sample only qualifies for Certified Seed, which is shown under the Seed Class section as F/C.

LAST NAME	FIRST NAME	TOWN	ACRES	CERT#	GEN#	NO. OF PLANTS	% LR	% MOS	% MIX	Seed Class
-----------	------------	------	-------	-------	------	---------------	------	-------	-------	------------

Emergence: If plant emergence count was less than 200, the Certification is based upon the 2007 summer field inspection.
If the sample was entered as Foundation, but the summer field reading was higher than 0.55% total virus, then the sample only qualifies for Certified Seed, which is shown under the Seed Class section as F/C.

Protected Varieties:

Varieties of seed potatoes with a (P) after their names are protected by patent or are otherwise not released to the public, and such varieties may only be certified if the applicant for certification provides authorization to propagate the variety by the patent holder or, if there is no patent, the registered breeder.

Seed Class:

F = Foundation - Total virus is .55% or less

F/C = entered as Foundation Seed but only meets Certified - Total virus is .56% to 5%.
