General Statement of Professional Experience (written by firm)

Design integration is the heart of AMEC. While, designing an aesthetically functional space or facility that communicates your business reflection is where most firms end, at AMEC this is only the beginning. Integrating our architectural design expertise with our in-house mechanical, electrical, civil, structural and environmental engineering expertise allows AMEC to execute both small and large scale projects, on time and within budget. We continually strive to exceed our clients' goals by providing the highest quality professional services and always looking after the project's best interest, with an emphasis on process, partnership and communication with the many stakeholders influencing your project. This project management-centric capacity to follow a project from drawing board to opening day and beyond is in AMEC's DNA.
