STATEMENT BY FIRM Established in 1996, Baker Design Consultants Inc. provides consulting engineering services to federal and state agencies, municipalities, institutions, corporations and private clients in Maine and beyond. The firm has an extensive portfolio of civil, marine, and structural engineering projects that include buildings, bridges, dams, piers, boat ramps, site development, waterfront structures and shorefront stabilization. The successful track record of planning, permitting, design and construction support can be attributed to the mission statement for the firm: "Baker Design Consultants is a firm dedicated to providing planning and design services to clients and communities on projects that make our infrastructure safer and on programs that encourage access to ocean, estuary, river, lake, and wilderness recreational resources in an economic, safe and environmentally responsible manner."
