STATEMENT BY FIRM At Fitzmeyer & Tocci, our consulting services are based on Thoughtful Practical Engineering. Services organized to provide Architects, Owners and Construction Managers logical, clear and concise intelligence in a rapidly changing Building Facility environment. Our focused multi-discipline engineering teams tightly integrate with the entire project team and provide hands-on engineering representation from project inception through construction closeout. Our model of Principal-Led teams improves coordination, quality, consistency and timely decisions. For over 50 years, Fitzmeyer & Tocci has been recognized throughout New England as leaders providing technical excellence, project leadership and creativity. Today, our dedicated Healthcare, Science & Technology and Academic Engineering Teams continue our tradition of advising institutional clients with integrated engineering solutions tailored to their needs. Whether for a renovation, addition or new construction, Fitzmeyer & Tocci has the technical expertise, experience and resources needed to meet the most demanding project requirements.
