NUMBER OF EMPLOYEES

STATEMENT BY FIRM The Garland Company is a manufacturer of commercial roofing and building envelope products. We have been in business for over 100 years, and in 2012 did about 400 million dollars in total sales. We are a full service manufacturer. This means that we have representatives like myself in manageable territories (like Maine) to locally assist building owners with water infiltration issues, product recommendation, budgeting, roof design and specifications, project oversight, and ultimately issuance of a long term warranty. This level of involvement is very unique to other manufacturer's in our industry.

PRE-QUALIFIED FOR Roof system design
