<input type="checkbox"/> Property appraisal	<input type="checkbox"/> Roof system design	<input type="checkbox"/> Space planning / programming

General Statement of Professional Experience (written by firm)

TRC provides a range of engineering services that allows us to work on all aspects of a development project. We can design roadways, sewer and stormwater drainage systems, utility services, site work, grading plans, and erosion and sedimentation control plans (Best Management Practices). Our reputation for practical, constructable designs is built on a long history of direct involvement in construction activities. Our civil engineers have carried projects from conceptual planning through construction. We have provided services to the Maine Department of Conservation since 2000.
