**Subject:** Comments on the developing broadband in Maine Strategic Document

Mr. Lindley,

I just wanted to let you know I published some comments to the strategic document that was published. There was much more detail I could have jumped into however, I felt an overall assessment of the document was more warranted and if there was any other questions by anyone I could address them specifically. I think overall the document was good, a few items here and there that were rather unclear. And one final item that maybe rather silly but the title? "Developing Broadband in Maine Strategic Plan". I hope that we have already developed Broadband and that as a group we are expanding its reach to every part of the state, citizens, businesses and to further increase its capacity. Perhaps a catchy title of "Expansion of Broadband Services for Further Economic Growth: Strategic Plan"

Just some ideas.

Again thank you for your time and have a great day!

Sean Trahan
