Subject: HCA's new Division 2 & 3 facility

Good morning,

As you may have heard, our plans to relocate to a building on the base that we had been in talks to purchase were disrupted by unexpected expenses for fire code renovations earlier this summer.

We had to go back to the drawing board and have spent the last several weeks looking at properties on Brunswick Landing that would meet our long term needs with little need for renovation. We are pleased to announce that we have found such a space, and have reached agreement for Div 2 & 3 to move to [8 Leavett Drive](#) on Brunswick Landing. This new facility has been recently renovated and offers us the combination of learning spaces of various sizes and large workshop spaces that will enable us to engage in exciting project based learning activities as we have long envisioned. We are working hard with our new landlords to ensure the building is fully ready for occupancy by September 6th. Our landlords are putting together the inspection information and documentation needed by you, and we will get that to you, as soon as it is available. We anticipate that our official certificate of occupancy is likely to be issued very close to the start of the school year.

John and the Board have been working round the clock to secure this location, and though it is coming together later than any one of us would want, we are very excited about the potential for this space, and we think you will be as well. We look forward to inviting you down to check out the space soon. If you have any questions, please let me know.

Take care,
Carrie
