**PARTNERSHIP FOR THE PRESERVATION
OF THE DOWNEAST LAKES WATERSHED
(PPDLW)**

October 14, 2016

Stacie R. Beyer
Chief Planner
Land Use Planning Commission
106 Hogan Rd, Ste 8
Bangor, ME 04401

Dear Stacie,

Please find attached our post-hearing/rebuttal comments in support of Wallace Lindahl's petition to Remove Carroll Plt from the Expedited Wind Energy Permitting Area.

Sincerely,

Gary A. Campbell
President

**STATE OF MAINE
LAND USE PLANNING COMMISSION**

Substantive Review, Carroll Plantation)	Rebuttal Comments of
Petition to Remove Carroll Plt from the Expedited)	Partnership for the Preservation
of the Permitting Area for Wind Energy Development)	Downeast Lakes Watershed
		(PPDLW)

PPDLW would like to comment on several points that came up during the September 28th hearing and in the post-hearing comments provided by the two Requestors.

Who are the Requestors?

In both their written and oral correspondence, Starr Clough and Holly Worster frequently say “we” when they should say “I”. This innocent oversight may be because they both hold positions at the Town Office and their devotion to Carroll Plt. obviously runs very deep. In this matter, however, they do not speak for their Town. Not all of the residents of Carroll agree with the Requestors. As we pointed out at the hearing, PPDLW has members who are residents of Carroll and support Mr. Lindahl’s petition. Several of them have written letters to the Commission and are in the record.

Economic Growth for Carroll Plt.

Carroll Plt's economy is exactly as the Requestors described. But Carroll's fiscal situation is outside the scope of the decision criteria set forth in P.L. 2015, ch. 265. Payments that a wind project owner pays to the hosting community is a topic reserved for DEP's review of Community Benefits when there is a wind permit application being considered.

Would PPDLW oppose a cell tower?

Following our oral presentation at the hearing, one of the Commissioners asked if PPDLW would also oppose cell tower in the area. I answered that our reaction to a hypothetical cell tower would depend on how our membership would feel about that. I'd like to elaborate by pointing out some of the differences between a cell tower and a wind project that would be relevant to a scenic impact assessment:

<i>Wind Project</i>	<i>Cell Project</i>
Consists of multiple turbines with the trend being toward facilities of 100+	Typically a single vertical monopole, guyed or lattice structure
Heights can range up to 557 feet to the tip of the blade.	Cellular or PCS cell site towers are typically 50-200 feet high.
Wind turbines have motion	Stationary
Motion can create shadow flicker	No shadow flicker
Noise can be an issue	Generally silent
Impossible to disguise	Scenic impact can be mitigated to an extent
Considerable infrastructure required to construct, operate and maintain	Much less infrastructure required.
Danger to birds and bats	Minimal danger to birds and bats
Susceptible to fires, risk of forest fires in remote areas.	Fires are extremely rare.

There are other differences (public value, reliability, health issues, breaking blades, ice throw) but these impacts would be more localized and would not likely impact the Downeast Lakes.

Of course this is a hypothetical situation and precise data would be needed before PPDW could make a decision. The point is that these differences may be enough that PPDW would not be inconsistent if it did not oppose permitting a cell tower.

Conclusion

We believe we have presented compelling evidence that the removal of Carroll Plt from the Expedited Wind Energy Permitting Area:

- A. Will not have an unreasonable adverse effect on the State's ability to meet the state goal for wind energy development in section 3404, subsection 2, paragraph C; and
- B. Is consistent with the principal values and the goals in the comprehensive land use plan adopted by the Maine Land Use Planning Commission pursuant to Title 12, section 685-C.

Carroll Plt therefore satisfies the two criteria and we respectfully ask the Commission to remove Carroll Plt from the expedited wind permitting area.

Dear Ms. Beyer,
My wife and I attended your meeting in Lincoln.

First of all, we would like to thank you for your excellent work! Day in and day out.

During the meeting, a lady mentioned, that fishermen would not care about the turbines. Wrong! Even if your back is towards the turbines, their reflections will pass the canoe and the sound (traveling very far over water) does not make one feel being in nature...

Enclose, please find some snapshots.

Again thank you and have a nice day.

Gaby and Rainer Egle, Upper Pond, Lincoln Me (Rollins South)

If you need better resolutions for prints, please let me know.

LUPC Windpower Expedited Area Petitions

Request for Substantive Review, Carroll Plantation

On September 28, 2016, the Land Use Planning Commission held a public hearing on the petition to remove Carroll Plantation from the expedited permitting area for wind energy development. The public comment period for the petition closed on October 10, 2016. The LUPC has now posted all of the timely public comments on its website. The documents can be accessed using the following hyperlink:

[Substantive Review, Carroll Plantation](#)

The public comments are linked under the Information and Links column for Public Comment in the Carroll Plantation table.

Any response to testimony and comments already in the record will be accepted until the rebuttal comment deadline of **October 17, 2016**.

If you have any questions about the substantive review of the petition to remove Carroll Plantation from the expedited area, please contact Stacie Beyer, Chief Planner, Land Use Planning Commission. She can be reached at the following e-mail address and phone

number:

Stacie.R.Beyer@Maine.gov

207-557-2535

For more details on the substantive review process, see the Process Overview document posted at: www.maine.gov/dacf/lupc/projects/wind_expedited_area/wind_expedited.shtml

Dear Stacie,

I am writing to request that the Commission keep Carroll Plt. in the expedited permitting area for wind power. I am a resident of and / or own property in a town near Carroll Plt., and care about the future of the people who live and work in the area.

I believe keeping Carroll Plt. zoned for wind power is appropriate. Doing so, is consistent with the land uses and activities in the area, which include several wind projects, and would provide an opportunity for a form of economic development that makes sense. I understand that some people object to the views of the turbines, but there are already turbines in the area, and allowing another project would not harm the recreational activities that currently exist.

Please do not change the process and zoning for Carroll Plt.

Respectfully submitted,

Dear Stacie,

I am writing to request that the Commission keep Carroll Plt. in the expedited permitting area for wind power. I am a resident of and / or own property in a town near Carroll Plt., and care about the future of the people who live and work in the area.

I believe keeping Carroll Plt. zoned for wind power is appropriate. Doing so, is consistent with the land uses and activities in the area, which include several wind projects, and would provide an opportunity for a form of economic development that makes sense. I understand that some people object to the views of the turbines, but there are already turbines in the area, and allowing another project would not harm the recreational activities that currently exist.

Please do not change the process and zoning for Carroll Plt.

Respectfully submitted,

A.C. Hayes, Inc.

I understand that some people object to the views of the turbines, but there are already turbines in the area, and allowing another project would not harm the recreational activities that currently exist.

Please do not change the process and zoning for Carroll Plt.

Respectfully submitted,

Stacie R. Beyer

Maine Land Use Planning Commission

106 Hogan Road, Suite 8

Bangor, Me 04401

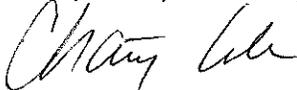

Dear Stacie,

I am writing to request that the Commission keep Carroll Plt. in the expedited permitting area for wind power. I am a resident of and / or own property in a town near Carroll Plt., and care about the future of the people who live and work in the area.

I believe keeping Carroll Plt. zoned for wind power is appropriate. Doing so, is consistent with the land uses and activities in the area, which include several wind projects, and would provide an opportunity for a form of economic development that makes sense. I understand that some people object to the views of the turbines, but there are already turbines in the area, and allowing another project would not harm the recreational activities that currently exist.

Please do not change the process and zoning for Carroll Plt.

Ridley A. Jensen
