Start a Sea Change

MISSION OF THE ICC

The International Coastal Cleanup
engages people to remove trash
and debris from the world's beaches
and waterways, to identify
the sources of debris
and to change the behaviors
that cause pollution.

Starting a Sea Change, Every Day

The ocean is essential to the health of everything on the planet – including our own. It provides much of the air we breathe, much of the food we eat and serves as the basis of our ecosystem. Fundamentally, the ocean is the life support system for our planet. Harmful impacts to that support system, such as marine debris, global warming, overfishing, pollutants, and habitat destruction, are exacting a toll we can no longer afford to pay. The plain truth is that our ocean cannot protect us unless it is healthy and resilient. And sadly, our ocean is sick.

But a sea change has started: I am so proud to announce that last year alone, more than 378,000 people from 76 countries came together to do something to improve the health of our ocean. From Bangladesh to Bangor, Maine, they joined efforts to clean up our shorelines as part of Ocean Conservancy's International Coastal Cleanup (ICC). Each year since 1986, these dedicated volunteers continue to make the ICC the world's largest volunteer cleanup event, inspiring others across the world to make ocean conservation an everyday priority. In addition to cleaner beaches and less polluted water, their efforts also provide vital information to help us understand the activities that produce debris and help prevent it in the first place.

Thousands of volunteers give their time, but the ICC's success is also dependent upon a growing network of dedicated leaders that I like to call 'Sea Stars': the coordinators who give so much time year-round to ensure that the Cleanup runs smoothly and our corporate partners whose generous gifts ensure that we have the necessary materials and financial support. I thank you all and know that without every one of you, the ICC could not be the amazing force it has become.

Trash in our ocean pollutes our water, kills and injures wildlife through ingestion and entanglement, but it also costs coastal communities economically, as well, in debris removal, lost tourism and lower property values. While the ICC accomplishes amazing results, one day of cleaning up will only be a drop in the ocean unless we expand our reach, bringing in new volunteers and new countries and expanding our commitment beyond the Cleanup to keeping our ocean healthy all year-round. We have the opportunity to make significant strides not only in cleaning up the existing trash that is polluting our water, but – more importantly – in reducing the amount that enters the oceans in the first place. After all, trash doesn't fall from the sky, it falls from people's hands.

Ocean Conservancy will continue its work to improve and expand the ICC and its related efforts throughout the year. But we need you to extend your commitment to healthy oceans beyond the one day event. So I offer this simple challenge: let's all carry with us throughout the year the profound commitment we make each September to keep our ocean healthy at every turn. If we all join together and make the ICC's mission an integral part of our daily lives, we could truly *start a sea change*, every day. It starts one day at a time.

VIKKI SPRUILL

President and CEO, Ocean Conservancy

OVERVIEW

In 2007, more than 378,000 volunteers participated in the International Coastal Cleanup (ICC) worldwide. These volunteers donated their time to remove more than six million pounds of debris from over 33,000 miles of shoreline – approximately 182 pounds of trash collected per mile!

The Cleanup saw an increase in international representation in 2007, with 76 countries holding a cleanup event (compared to the 66 who participated in 2006). It also marked the second year of China’s involvement with ICC efforts: in Shanghai, 75 volunteers collected 715 pieces of debris, weighing 285 pounds. Russia also took part in the Cleanup for the first time since 2003. Thirty-two volunteers cleaned nearly 400 feet of shoreline on the coast of the Ussuriysky Gulf in Vladivostok collecting 98 pounds of garbage.

ICC events in both Russia and China in 2007 were organized due to the efforts of the Northwest Pacific Action Plan (NOWPAP) of UNEP. With the NOWPAP assistance, cleanup campaigns will be continued in these countries in 2008-2009 and beyond. Several other countries increased their participation levels. After suffering through two successive typhoons in 2006, which limited its number of volunteers, the Philippines returned to the 2007 ICC in strong form, drawing 50,526 people on land and 721 underwater, making it the ICC’s largest international cleanup effort. India also had a strong showing. While covering approximately the same distance as in 2006, the country more than doubled the number of pounds volunteers picked up (more than 128,000 pounds in 2007 compared to 59,000 pounds in 2006).

Significant increases weren’t exclusive to Asia, however. Several Caribbean countries also improved on last year’s

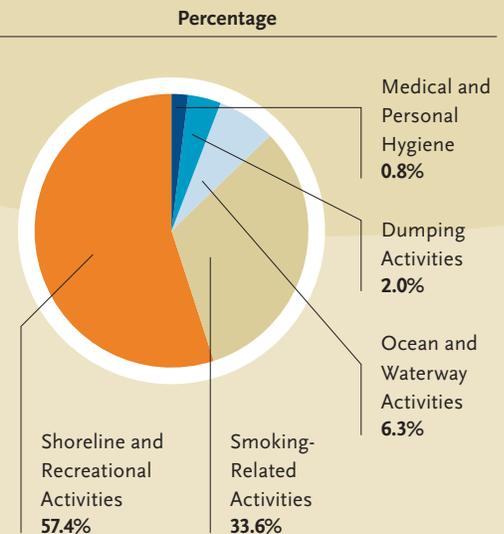

cleanup efforts. In Trinidad and Tobago, volunteer numbers jumped from 894 to 2,250, an increase of more than 60 percent. And in the Bahamas, volunteer participation exploded a whopping 82 percent as 1,037 volunteers joined in cleanup efforts (compared to 2006’s 180 volunteers). These volunteers removed an average of almost 78 pounds of trash per mile, which equaled 80 percent more pounds of debris collected per mile than last year.

While land-based efforts accounted for the vast majority of activities, cleanups weren’t limited to shorelines and beaches. Volunteers also retrieved debris from beneath the water’s surface. In fact, more than 8,300 divers took part in underwater cleanup efforts – spearheaded by Project AWARE – and cleaned up more than 161,000 pounds of debris over 1,000 miles of underwater terrain. That’s an average of 20 pounds of trash collected per diver.

WORLDWIDE SOURCES OF DEBRIS

2007 Land & Underwater Cleanups (combined)	Number	Percent
Dumping Activities	142,800	2.0%
Medical and Personal Hygiene	54,367	0.8%
Ocean and Waterway Activities	453,955	6.3%
Shoreline and Recreational Activities	4,157,583	57.4%
Smoking-Related Activities	2,429,496	33.6%
Totals	7,238,201	100.0%

2007 Land Vs. Underwater Cleanups	Land	Underwater
Dumping Activities	2.0%	2.4%

Ocean and Waterway Activities	6.2%	12.2%
Shoreline and Recreational Activities	57.5%	53.7%
Smoking-Related Activities	33.6%	30.8%

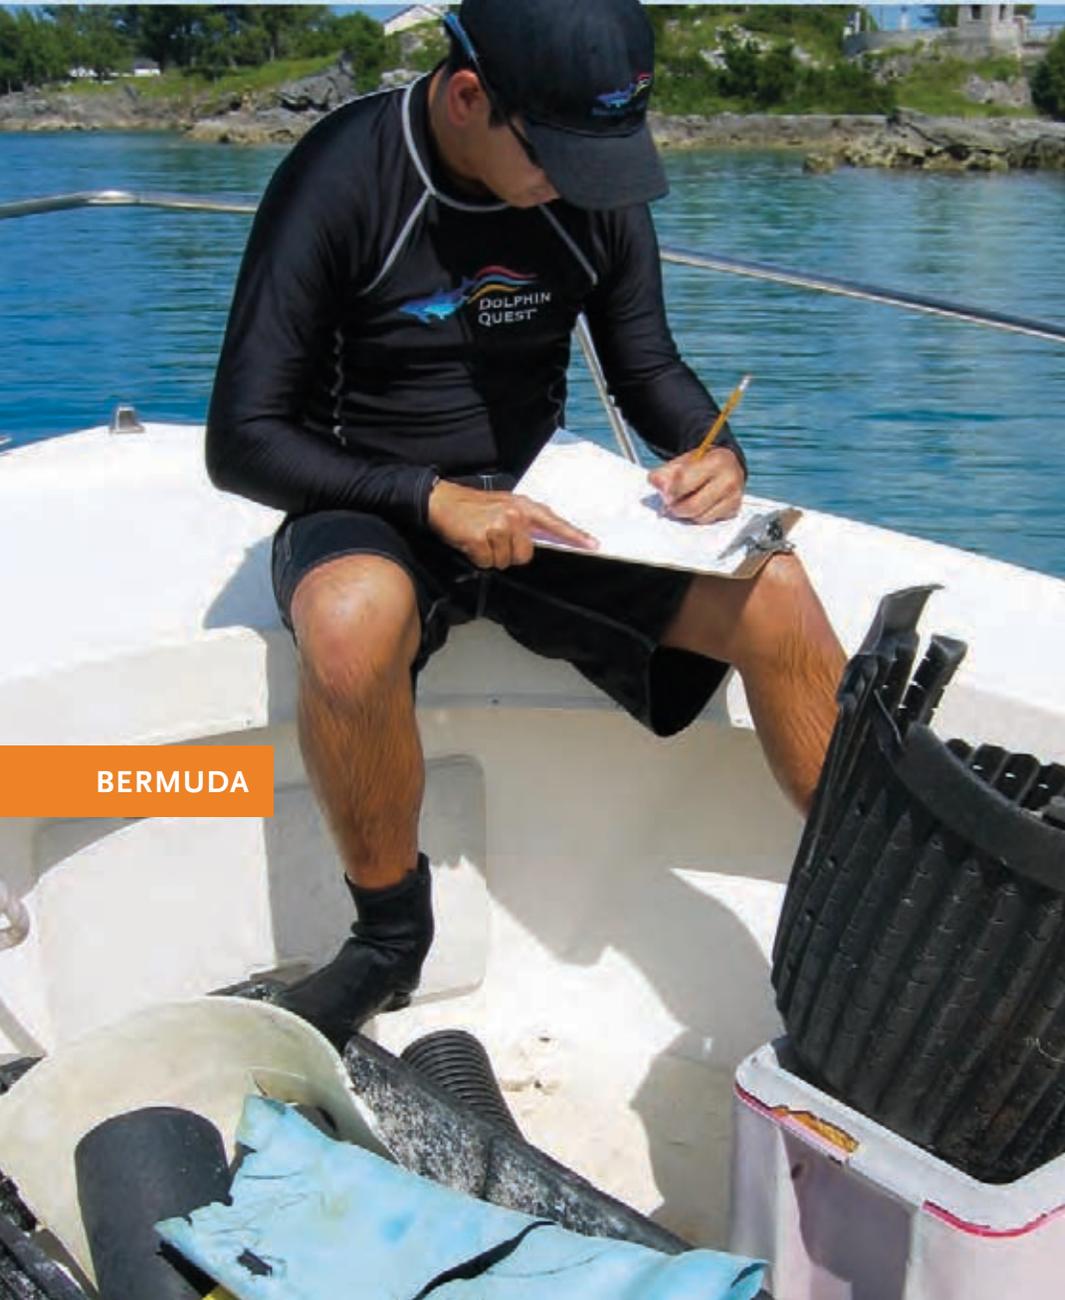

Globally, 378,192 people picked up
6,075,698.4 pounds of debris,
over 33,426.45 miles.

THAILAND

How Do the Oceans Get Trashed?

BERMUDA

Shoreline and Recreational Activities

The majority of marine debris comes from land-based activities such as fast food consumption, beachgoers, picnics, sports and recreation, festivals, as well as litter washed from streets, parking lots and storm drains.

Ocean/Waterway Activities

Recreational fishing and boating, commercial fishing, cargo/military/cruise ship operations and offshore industries such as oil drilling can produce marine debris.

Smoking-Related Activities

Improper disposal of cigarette filters, cigar tips and tobacco product packaging is common on both land and sea.

Dumping Activities

Legal and illegal dumping of building materials or large household items can result in debris.

Medical/Personal Hygiene

This debris can result from people improperly disposing of waste in toilets and city streets. Since medical and personal hygiene debris often enters the waste stream through sewer systems, its presence on the beach can indicate the presence of other, unseen pollutants.

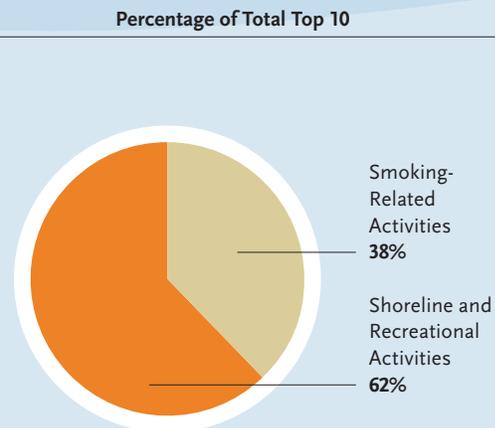

With more than 190,000 volunteers scouring shorelines above and below the waterline in 45 states, the United States accounted for half of all ICC volunteers. California had the greatest turnout, accounting for 32 percent of U.S. volunteers, 22 percent of pounds collected and nearly 25 percent of miles cleaned. (For more information on California's cleanup coordination efforts, see page 15.) The 2007 Cleanup also marked additional participation in inland cleanups along local waterways, with states such as Alabama, Kentucky, and Louisiana more than doubling their number of volunteers from last year.

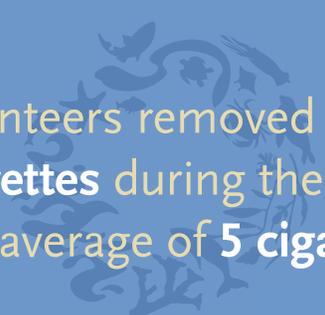

Worldwide, volunteers removed an average of **16 pounds of trash per person.**

TOP 10 DEBRIS ITEMS COLLECTED WORLDWIDE

Item	Number	Percent
Cigarettes/Cigarette Filters	1,971,551	27.2%
Food Wrappers/Containers	693,612	9.6%

Total Debris Worldwide	7,238,201	84.1%

Volunteers removed
nearly **2 million cigarettes** during the 2007 Cleanup.
That's an average of **5 cigarettes per volunteer.**

ILLINOIS

While cleaning up existing debris is a vital element of the ICC, the data that volunteers collect is just as, if not more, important. Data compiled from previous Cleanups has been integral to helping us learn about the behaviors that cause marine debris and serving as a resource for creating programs designed to educate people on the importance of debris prevention. ICC data has been used as a basis to help draft legislation, including the Marine Debris Research, Prevention, and Reduction Act, which Congress passed in 2006. The data was also an integral aspect to the chapter on marine debris in the U.S. Commission on Ocean Policy's 2003 report, which listed recommendations for the United States to take to improve the health of our oceans. As in years before, Ocean Conservancy will continue to compile and analyze data gathered at the cleanups and use the information to help stem the tide of marine debris.

Since 1994, more than 50 percent of all the debris collected in the ICC has come from shoreline and recreational activities; 2007 was no different, with these activities accounting for 57 percent of all debris. Smoking-related activities came in second, accounting for 33 percent of debris. In fact, volunteers removed almost two million cigarettes/cigarette filters during the cleanup.

Ocean Conservancy joins First Lady to Champion White House Initiative on Marine Debris

In November 2007, Ocean Conservancy President Vikki Spruill was honored to join First Lady Laura Bush to announce the White House's new marine debris initiative during the dedication ceremony of the J.L. Scott Marine Education Center – Gulf Coast Research Laboratory in Biloxi, Mississippi.

The White House initiative calls for an increase in public/private partnerships on cleanups, enhanced public education on debris prevention and an emphasis on international cooperation to end dumping in the ocean. The First Lady has supported marine debris prevention since seeing its damaging effects on a trip to the Northwestern Hawaiian Islands National Marine Monument.

Vikki Spruill, the only representative of the conservation community at the event, said, "I am excited about the synergies between the new White House plan for addressing marine debris and Ocean Conservancy's ongoing work. The First Lady's dedication to the issues we have been fighting for years is inspiring – and, it gives a big push to the sea change that is underway."

Then in March, at the White House Easter Egg Roll, the First Lady spoke to the tens of thousands of children at the event about the value of keeping our ocean healthy and specifically thanked Ocean Conservancy for its work.

TOP 10 DANGEROUS DEBRIS ITEMS COLLECTED WORLDWIDE

Item	Number

Six-Pack Holders	31,144
Strapping Bands	3,378
Syringes	6,435
TOTALS	975,378

In addition to being an eyesore, marine debris also poses hazards and dangers for wildlife and people. Marine debris kills more than one million seabirds and 100,000 marine mammals and turtles each year (S. Casey, *Best Life*, November 2006). Unfortunately, every year, ICC volunteers find a variety of marine wildlife species entangled in debris. In 2007, participants found 237 entangled animals. Birds represented nearly 35 percent of entangled wildlife, followed by fish (27 percent), invertebrates (20 percent), mammals (nearly 13 percent), reptiles (almost five percent) and amphibians (less than one percent).

Discarded monofilament fishing line is perhaps the single-most dangerous debris item and accounted for 65 percent of entanglements found during the ICC. In fact, derelict fishing gear – which includes fishing line, nets, rope, lures and light sticks, and crab/lobster/fish traps – represented 72 percent of all entanglements.

81 birds, 63 fish, 49 invertebrates, 30 mammals, 11 reptiles, and one amphibian were found entangled in debris during the cleanup.

2007 ICC ENTANGLING ANIMALS WORLDWIDE

Global Initiative on Marine Litter

Through its Regional Seas

Programme (RSP) and Global Programme of Action for the Protection of the Marine Environment from Land-based Activities (GPA), the United Nations Environmental Programme (UNEP) has developed a “Global Initiative on Marine Litter” to address this global pollution issue.

The initiative focuses on both regional and global efforts. At the regional level, RSP is concentrating on the establishment and development of regional pilots based in areas that are particularly affected by marine litter. The effort assists 12 Regional Seas Conventions and Action Plans to address marine debris in the Baltic Sea, Black Sea, Caspian Sea, East Asian Seas, Eastern Africa, Mediterranean Sea, Northeast Atlantic, Northwest Pacific, Red Sea and Gulf of Aden, South Asian Seas, Southeast Pacific, and Wider Caribbean.

Globally, UNEP’s initiative provides a platform to establish partnerships and cooperation for the coordination of activities to control and sustainably manage marine debris. Several global activities include:

- Preparing with FAO a joint review on the problem of derelict fishing gear;
- Developing with IOC joint guidelines on surveying and monitoring marine debris;
- Preparing jointly with Ocean Conservancy a report “An Overview of the Status of Marine Litter in UNEP’s assisted Regional Seas”;
- Preparing jointly with IEEP a document “Marine Litter and Market-based Instruments”;
- Publishing outreach and educational materials on marine debris; and
- Developing and maintaining a marine debris website, which serves as an information portal to provide news and updates on the debris issue,

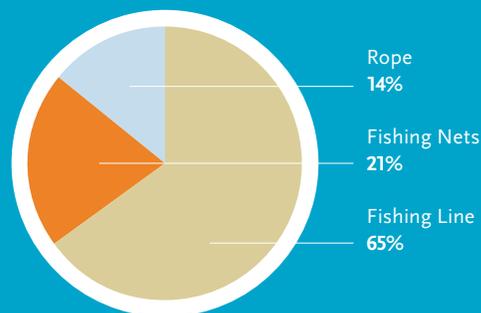

regional activities, and links to partners (www.unep.org/marinelitter).

In addition, UNEP encourages the development of global and regional beach cleanup campaigns as part of Ocean Conservancy’s International Coastal Cleanup.

2007 ICC Sponsoring Partners

Ocean Conservancy is grateful for the generous support of our 2007 ICC sponsors. Their support makes the program possible, from planning and implementation of the cleanups to annual ICC coordinator training to outreach and promotion to reporting on our success in removing marine debris from the ocean. The statements below recognize those partners that donate \$10,000 or more to the ICC.

The Coca-Cola Company

For more than a decade, The Coca-Cola Company has been a proud partner of Ocean Conservancy's ICC. Working together, we help keep our coasts clean while learning more about the causes of marine debris. We value our engagement with the ICC as an important part of what Coca-Cola does to educate people about how we can all play a role in protecting the planet.

Bank of America

Bank of America has been a proud partner of Ocean Conservancy for seven years, because we believe that healthy communities create good business opportunities. The bank's employees have volunteered in ICC events around the country, helping to reduce human impacts on the environment.

Glad

The Glad Products Company – a subsidiary of the Clorox Company – is proud to supply ICC volunteers with its trash bags to remove marine debris from their local communities and raise awareness of personal responsibility in bringing an end to litter and debris in our environment.

National Oceanic and Atmospheric Administration (NOAA)

The NOAA Marine Debris Program values the ICC as more than an annual cleanup event. It is an excellent outreach and educational tool that instills a crucial behavior change in its various participants. This activity can lead to an overall behavior change in regards to reducing the amount of marine debris that enters the environment.

Brunswick Public Foundation

The Brunswick Public Foundation is proud to support Ocean Conservancy's ICC, which motivates individuals of all ages to come together and protect marine life and waterways. Our organization is pleased to support the ICC and to help keep the marine environment safe and clean.

Dow

Dow is proud to have sponsored the ICC effort for more than 20 years, supplying over 4 million trash bags to volunteers and engaging our employees in local cleanup activities. We are thrilled to partner with organizations like Ocean Conservancy that are dedicated to developing global solutions and public education to change the behaviors that cause marine debris.

Oracle

Oracle is committed to protecting the environment and enriching community life. We seek out intersections between the needs of society and the goals of our company and make investments that benefit both. Oracle's support of Ocean Conservancy's ICC is an example of our commitment at work.

Ocean Conservancy is grateful for the generous support of our sponsors.

Philip Morris USA

One of Philip Morris USA's mission objectives is to reduce the environmental impact of our business and promote the sustainability of the natural resources on which we depend. We are proud to partner with Ocean Conservancy on the ICC to raise awareness of the causes of marine debris and to help educate the public on the proper disposal of all debris.

8,321 scuba divers removed 161,513 pounds of debris
during underwater cleanups.

National Marine Sanctuary Foundation

We are so pleased to be a partner of the ICC. This program is a tremendous effort toward making the public more aware of the marine debris issue, providing a practical and real solution through beach cleanups and motivating and engaging people to change their future behavior.

Endangered Species Chocolate

Endangered Species Chocolate partners with organizations that have an aggressive and clear mission to help species, habitat and humanity — a bill that the ICC truly fits. The Cleanup is an inspiration, engaging thousands of volunteers to make the planet a cleaner, safer place for all of its inhabitants.

Sea World Busch Gardens Conservation Fund

Unfortunately, we see the results of marine debris first hand at Sea World. Our Rescue and Rehabilitation Team is on call every day of the year to respond to animals in crisis, many negatively impacted by human trash that made its way to the ocean. Everyone can protect animals by picking up trash — it's that simple. We're proud and honored to support and participate in the ICC.

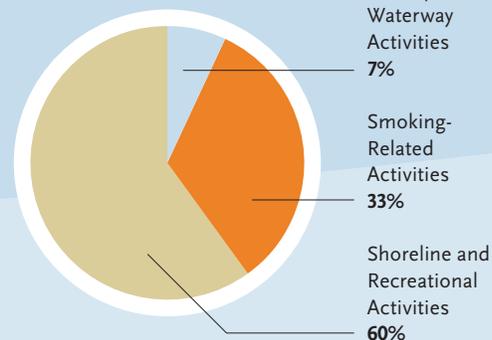

247,099 debris items related to derelict fishing gear were removed during the cleanup. This includes crab/lobster/fish traps, fishing line, fishing lures/light sticks, fishing nets and rope.

Making a World of Difference, One Person at a Time

VOLUNTEER PROFILE Setting an Example for Future Generations

If only every 6th grader paid this much attention in class. Kaelin Lambert, a student at Trinity Lutheran School in Ludington, Michigan, has taken her school's message of protecting the environment to heart. In 2007, she organized her school's first adopt-a-beach project as part of the ICC.

"Environmental issues have always been important to me," she explains. "I was drawn to this project after witnessing firsthand a barge dumping garbage off the coast of Ludington. This experience made me determined to try to make a difference for the Great Lakes."

Using local newspapers and school announcements to spread her message, Kaelin convinced 16 of her fellow students, teachers, family and friends to join in the effort. Together, they cleaned up 100 pounds of trash from a half mile of Lake Michigan shoreline and drew important attention to marine debris issues. And the group plans to continue more cleanup efforts in the coming years.

That sense of enduring stewardship is important to Kaelin. "The Great Lakes were created by God and must be protected for future generations," she says. "I believe I made a difference for the future."

Kaelin
Lambert

COORDINATOR PROFILE An Expression of Civic Strength

Each year, volunteers in California pick up almost one million pounds of debris during the ICC. Coordinating their efforts is Eben Schwartz, Outreach Manager of the California Coastal Commission and California's ICC Coordinator.

The California Coastal Commission has been a part of the ICC since 1987; Eben began organizing the Commission's cleanup effort in 2000. At that time, 34 of the state's 58 counties participated in the ICC. In the last seven years, Eben has seen that number increase to 48. He hopes to have the remaining 10 counties on-board in the near future.

"We want the Cleanup to become the one volunteer activity each year that every Californian has a chance to participate in," he says.

To accomplish this goal, Eben and the California Coastal Commission are expanding outreach efforts beyond their traditional audience of students, teachers and their families and appealing to all Californians to participate. "Through the Cleanup, we are able to draw thousands of new people each year into our common mission of coastal stewardship."

For Eben, that sense of stewardship also extends to civic pride and responsibility. "The Cleanup is much more than a simple volunteer event. It is a way for citizens to express their power," he explains. "It's both a physical way for people to give back to the coast and a symbolic act that tells our elected officials how much we care about our environment."

ILLINOIS

PARTNER PROFILE Providing Opportunities for Debris Prevention

The federal National Oceanic and Atmospheric Administration Marine Debris Program (NOAA MDP), established in 2005, works to identify, reduce and prevent marine debris in our environment on a national and international level.

The program – which recently won one of NOAA’s highest awards for its outstanding efforts – addresses the issue through marine debris prevention, research and removal projects. As part of this effort, the NOAA MDP has established two competitive grant programs that provide federal funding to non-federal applicants nationwide and provide an opportunity for NOAA scientists to implement marine debris projects around the country.

To date, the MDP has funded more than 100 projects that address marine debris in our country’s waterways. Examples include research projects to assess the impacts of derelict crab pots on the Chesapeake Bay; prevention activities that increase the number of monofilament line recycling bins along our coastal beaches and piers; coordination with federal, state and local organizations to

provide ongoing support to hurricane recovery efforts in the Gulf of Mexico; development of a high quality body of information on general marine debris and its impacts; and partnership with Ocean Conservancy to support the ICC. Through these projects and other partnerships, the NOAA MDP aims to better understand the sources and impacts of marine debris in the ocean, provide education on ways to reduce debris in the environment and contribute to the further development of solutions to the problem.

“Marine debris is everyone’s problem,” states Dr. Holly Bamford, director of the NOAA MDP. “We all have an effect on the debris that enters our waterways, whether you live on the coast or in the middle of the country. Taking steps to dispose of your trash properly and recycling can go a long way toward ensuring healthy oceans for the future. Partnering with Ocean Conservancy on the International Coastal Cleanup is an ideal outreach and educational tool for instilling a positive behavior change in participants.”

CORPORATE PARTNER Being Good Mates

Brunswick, the leader in the marine industry, established the Brunswick Public Foundation in 1997 to support community development and organizations that enhance the country’s water resources for the public’s recreational use. Brunswick believes that water access should be available to everyone for the participation and enjoyment of water activities.

As a result, since 1997, Brunswick has provided almost \$1 million in support of Ocean Conservancy’s ICC and Good Mate programs, enabling us to grow volunteer participation and build alliances with organizations such as the U.S. Coast Guard Auxiliary, U.S. Power Squadrons, and the Association of Marina Industries. In addition, Brunswick’s support has enabled the transfer of Good

Mate educational materials from bulky binders to a more user-friendly CD format that Ocean Conservancy then distributes via our website and partner organizations.

“The Brunswick Corporation, through the Brunswick Public Foundation, is pleased to be an investor in Ocean Conservancy’s programs because they get people all over the world engaged in protecting and improving water recreation areas,” states David C. Knight, President of Brunswick Public Foundation. “We applaud their ability to motivate large numbers of people and members of the marine community through their many collaborative relationships with both national, international, public and private organizations. We look forward to the future growth and continued success of these programs.”

Public
Foundation

10 Things You Can Do To Stop Marine Debris

- 1** Join Ocean Conservancy's International Coastal Cleanup.
- 2** Clean up your trash. Throw all trash away in proper receptacles, even when you're not on the water. Pick up any debris you see while out.
- 3** Collect your monofilament fishing line. Don't leave fishing line behind and retrieve any other line you may find while fishing, but be careful not to tug on snagged lines, which could be caught on habitat below the surface.
- 4** Contain and properly clean spills when boating. Use oil-absorbent rags and materials to clean spills. Check Ocean Conservancy's *Good Mate* manual for helpful tips on reducing your negative impacts on the water.
- 5** Recycle used motor oil and oil filters. Local gas stations should have appropriate facilities for recycling these materials. NEVER pour oil, paint, antifreeze or other household chemicals into an open sewer or down a storm drain.
- 6** Consider organic alternatives to household detergents and cleaners. Use lemon juice, vinegar and baking soda for household cleaning. Avoid using fertilizers, pesticides, herbicides and harsh chemical cleaners that can wash into waterways.
- 7** Choose reusable items and use fewer disposable ones. Use fewer disposable bags when shopping or bring your own reusable ones.
- 8** Properly dispose of used batteries and electronics. Use your local recycling center. Don't dump them in landfills. Electronics leach harmful chemicals into the environment that take a long time to disperse.
- 9** Keep streets, sidewalks, parking lots and storm drains clear of trash and debris – they empty into our ocean.
- 10** Contact your elected representatives and let them know you care about marine debris – and that they should, too. Vote for candidates who support marine debris prevention and policies that protect our environment.

Clean up your trash.
Throw all trash away in proper receptacles,
even when you're not on the water.
Pick up any debris you see while out.

BERMUDA

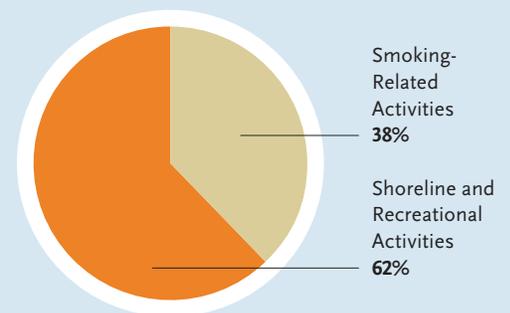

In the last 22 years, the International Coastal Cleanup has grown from a single individual's vision of clean beaches into a worldwide phenomenon. Through it all, Ocean Conservancy offers guidance and support to the thousands of volunteers and coordinators through training, promotional materials, cleanup supplies, and – perhaps most importantly – a global network of like-minded peers to help foster a sense of teamwork and camaraderie that crosses international boundaries. Just as there is no shore on earth that is free from trash, Ocean Conservancy envisions a future in which no place on earth is ignored in the fight against debris. The ICC is a fundamental aspect of this vision.

Ocean Conservancy envisions a future in which **no place on earth is ignored in the fight against debris.** The ICC is a fundamental aspect of this vision.

Cigar Tips	325,284	4.5%
Straws/Stirrers	323,160	4.5%
Beverage Cans	303,475	4.2%
Total Top 10 Debris Items	6,048,308	
Total All Debris Items from Land Cleanups	7,187,986	84.1%

Percentage of Total Top 10

COORDINATORS & SPONSORS

Special thanks to our coordinators and sponsors for their generous support.

Their kind gifts keep our volunteers motivated and energized for the difficult work of coastal cleanup.
