

## Pre-Test Evaluation: Lesson 2

1. What is metamorphosis?
  - a. The study of insects
  - b. A type of insect
  - c. A change in form
  - d. A scientist
  
2. What are the life stages of an insect with complete metamorphosis, like a butterfly?
  - a. Egg, larva, pupa, adult
  - b. Egg, immature, adult
  - c. Baby, child, adult
  - d. Teenager, adult
  
3. What are the life stages of an insect with incomplete metamorphosis, like a praying mantis?
  - a. Egg, larvae, pupa, adult
  - b. Egg, immature, adult
  - c. Baby, child, adult
  - d. Teenager, adult
  
4. Why does an insect molt?
  - a. To get clean
  - b. To get shinier
  - c. To grow larger
  - d. No one knows
  
5. Only adult insects have wings
  - a. True
  - b. False

## Post-Test Evaluation: Lesson 2

1. What is metamorphosis?
  - a. The study of insects
  - b. A type of insect
  - c. A change in form
  - d. A scientist
  
2. What are the life stages of an insect with complete metamorphosis, like a butterfly?
  - a. Egg, larva, pupa, adult
  - b. Egg, immature, adult
  - c. Baby, child, adult
  - d. Teenager, adult
  
3. What are the life stages of an insect with incomplete metamorphosis, like a praying mantis?
  - a. Egg, larvae, pupa, adult
  - b. Egg, immature, adult
  - c. Baby, child, adult
  - d. Teenager, adult
  
4. Why does an insect molt?
  - a. To get clean
  - b. To get shinier
  - c. To grow larger
  - d. No one knows
  
5. Only adult insects have wings
  - a. True
  - b. False

## Pre/Post-Test Evaluation: Lesson 2 Key

1. What is metamorphosis? C
  - a. The study of insects
  - b. A type of insect
  - c. A change in form
  - d. A scientist
  
2. What are the life stages of an insect with complete metamorphosis, like a butterfly? A
  - a. Egg, larva, pupa, adult
  - b. Egg, immature, adult
  - c. Baby, child, adult
  - d. Teenager, adult
  
3. What are the life stages of an insect with incomplete metamorphosis, like a praying mantis? B
  - a. Egg, larvae, pupa, adult
  - b. Egg, immature, adult
  - c. Baby, child, adult
  - d. Teenager, adult
  
4. Why does an insect molt? C
  - a. To get clean
  - b. To get shinier
  - c. To grow larger
  - d. No one knows
  
5. Only adult insects have wings. A
  - a. True
  - b. False
