13345	Homeowner Tidal Power Project	Phippsburg	Kennebec River	Sheerwater Design, Inc.	A	Preliminary Permit issued July 1, 2009. Deadline for filing draft application for pilot project license is July 1, 2011.
-----	TideWorks LLC Project	Georgetown	Sasanoa River	TideWorks LLC	A	Notice of Intent to file exemption application submitted February 9, 2009. Joint agency/public meeting held March 23, 2009. Draft exemption application circulated July 1, 2009.

STATUS: A = Active; I = Inactive.

NOTE 1: Preliminary permits are issued by the Federal Energy Regulatory Commission (FERC) for a period effective the first day of the month in which the permit is issued, and ending either 36 months from the effective date or the date on which a license application submitted by the permittee has been accepted for filing, whichever comes first. The purpose of a preliminary permit is to preserve the right of the permittee to have the first priority in applying for a license for the project being studied.

NOTE 2: FERC has established expedited licensing procedures for individual hydrokinetic test projects that are proposed to be: (1) small (less than 5 MW); (2) short term (generally, 5 years or less); (3) not located in sensitive areas; (4) removable and able to be shut down on short notice; (5) removed, with the site restored, before the end of the license term, unless a new license is issued); and (6) initiated by a draft application in a form sufficient to support environmental analysis.
