

## **Stormwater Technical Sub-Group Meeting**

Wednesday, July 23, 2003

### **Draft Meeting Summary**

Attendance: Steve Bradstreet, Dave Bragg, Pat Clark, Charles Hebson, Dave Kamila, Kevin McKee, Peter Newkirk, Jim Ring, John Simon. DEP Staff: Mary Breton, Jeff Dennis, John Hopeck, Marianne Hubert, Art McGlauffin, Dave Waddell, Don Witherill

Don Witherill reviewed the issues to be discussed. The meeting was focused, for the most part, on infiltration. Much of the discussion was on the DEP draft proposed standards for infiltration basins, dry wells and subsurface fluid infiltration systems. Rich Claytor joined the discussion via speakerphone from 2:00 to 3:00 p.m.

There was much discussion that, as proposed, the standards were very strict and may make it unlikely that anyone would use an infiltration system as a means of stormwater management. DEP staff advised that the draft proposed standards distributed were only a first draft and are by no means a final document. Attendees were encouraged to submit written questions/comments to Don Witherill.

A handout on proposed additions to quantity standards was distributed. Attendees were asked to review the handout and send any comments to Marianne Hubert prior to the next meeting.

Another meeting date is scheduled for August 21<sup>st</sup> at 1:00 in the DEP Response Training Room.
