

**Maine Department of Environmental Protection**  
**Discharges from Vessels Project – Second Stakeholders Meeting**  
**August 25, Monday, 2003 – 1:30–4:30 p.m.**

**Agenda:** The primary focus of the second meeting is on No Discharge Zones (NDZs)

- 1:30 Introduction (5 minutes).
- 1:35 (1) Presentation (10 minutes or less). What are the current problems in Maine and are vessels causing them? (2) Why is the staff recommending some increased increased regulation and what are the main tools?
- Questions and discussion by the group. (20 minutes).
- 2:05 NDZs: How should the boundaries of the waters to be designated as federal NDZs be determined? Presentation (5 minutes) followed by questions/discussion.
- 3:00 Break
- 3:10 Schedule for identifying NDZs. See Strawman, Blackwater -- Option 1 v. Option 2. Presentation (5 minutes) followed by questions/discussion by group.
- 3:30 Should Maine create state NDZs for graywater?  
How could such a "state" NDZ differ from a "federal" NDZ? (5 minute presentation).  
Listing of pros/cons and discussion by group.
- 4:15 Given the time remaining --
1. The strawman addressed a number of types of discharges (graywater, blackwater, etc.) in some fashion. Where there any other major types of discharges that you think the group should discuss that were not included?
  2. Of the resulting list (strawman plus any additions), which do you most want to discuss at some point during the next meeting?
