

DEPARTMENT OF ENVIRONMENTAL PROTECTION

LICENSING FEE SCHEDULE

Effective: November 1, 2007 to October 31, 2008

AIR QUALITY

AIS Code	Description	Processing Fee	Licensing Fee
70	part 70 air license (c. 140)	(see I & II below)	(see I & II below)
71	major & minor source license (c.115)	(see I & II below)	(see I & II below)
72	general permit	(see I & II below)	(see I & II below)
75	property, sales & use tax exemption certification	\$334	\$27
76	Variance	(see I & II below)	(see I & II below)

I. All licensed air emission sources pay an **annual license fee** assessed based on the sum of all licensed allowable air pollutants, except for carbon monoxide. The annual fee is:

Annual licensed emissions, in tons	Fee per ton
from 1 to 1000.....	\$ 7.28
from 1001 to 4000.....	\$14.59
additional emissions over 4,001	\$21.86

II. In addition, an **air quality surcharge** of \$13.41 for every 1000 air quality units is added to the annual license fee. Air quality units are determined by multiplying the toxicity score of a hazardous air pollutant by the estimated emission on that pollutant.

- The minimum annual license fee is \$334 and the maximum annual license fee is \$201,326. The minimum air quality surcharge is \$134 and the maximum is \$67,130.
- The annual license fee and surcharge (“annual fees”) are paid on the anniversary date of the license. Once that date is established, it remains the scheduled date for payment of the annual fees.
- New applications must include estimated annual fees before that application is accepted for processing.
- There are no additional fees for minor revisions, amendments, transfers or renewals.
- Failure to pay annual fees within 30 days of the license anniversary date is grounds for revocation of the license.

LAND & WATER QUALITY - NATURAL RESOURCES PROTECTION ACT (CON'T)

The following fees are used to calculate the application cost for projects which alter 20,000 square feet or more of freshwater wetland; square feet proposed for alteration is multiplied by each fee.

Description	Processing Fee	Licensing Fee
alteration involving fill or structure	.0195/sq. ft.	.0065/sq.ft.
alteration; other (e.g., removal of vegetation, flooding, dredging)	.0050/sq. ft.	.0016/sq.ft.*

*not to exceed \$6,213

The fee for **modification** of all NRPA permits except codes TA, TB & TC is \$127 if there is no change in square footage; the fee for **modification** of permit codes TA, TB & TC is \$35 if there is no change in square footage. NRPA permits cannot be **amended** and are transferred using a PBR application.

LAND & WATER QUALITY - WASTEWATER DISCHARGE

I. All facilities licensed to discharge pollutants to the waters of the state pay an annual waste discharge license fee consisting of (A) a base fee, (B) a discharge or license fee, where applicable, and (C) fee adjustments, where applicable.

I-A. A base or minimum fee is assessed for the categories of discharges/licenses identified below. Where a license authorizes discharges in more than one category, only the largest base fee applies. A maximum fee has been established for some categories; this reflects the maximum annual fee (base fee plus discharge/license fee plus fee adjustments) that may be assessed to an individual facility in that category. When a license authorizes multiple discharge points in different categories, the total maximum fee for the license may not exceed the maximum fee for the most significant category plus one-half the maximum fee for each of the other applicable categories.

AIS Code	Description (Category)	Type of fee	Base fee not to exceed	Maximum fee for individual in group
5A	residential OBD up to 600 GPD	annual fee	\$197	-
5B	residential OBD over 600 GPD	annual fee	\$226	\$678
5C	commercial OBD	annual fee	\$237	\$1,356
5D	publicly owned OBD	annual fee	\$237	\$565
5G	aquatic pesticide general permit	annual fee	\$249	-
5J	sanitary wastewater, commercial (non-OBD)	annual fee	\$75	\$1,502
5K	POTW less than 6,000 GPD, with no significant ind. waste	annual fee	\$67	\$203
5L	POTW 6,000 GPD to 5 MGD, with no significant ind waste	annual fee	\$219	-
5M	POTW over 5 MGD or with significant industrial waste	annual fee	\$964	-
5N	major industrial facility process wastewater	annual fee	\$2,317	-
5O	minor industrial facility process wastewater	annual fee	\$789	-
5P	food handling or packaging wastewater	annual fee	\$394	\$2,630
5Q	fish rearing facility	annual fee	\$288	\$1,753

LAND & WATER QUALITY - WASTEWATER DISCHARGE (§ I-A CON'T)

AIS Code	Description (Category)	Type of fee	Base fee not to exceed	Maximum fee for individual in group
5R	non-contact cooling water	annual fee	\$112	\$8,767
5S	miscellaneous or incidental non-process wastewater from industrial or commercial sources	annual fee	\$144	\$2,630
5T	municipal combined sewer overflow	annual fee	\$144	\$1,753
5U	aquatic pesticide application	annual fee*	\$250	-
5V	snow dumps	annual fee*	\$156	-
5W	salt and sand storage pile	annual fee*	\$187	-
5X	log storage permit	annual fee*	\$250	-
5Y	general permit coverage	annual fee*	\$125	-
5Z	experimental discharge license	annual fee*	\$626	-
51	creation of mixing zone	flat fee*	\$5,009	-
54	formation of sanitary district	flat fee*	\$375	-

* Discharge or license fees do not apply to these categories.

I-B. A discharge or license fee is assessed for the pollutants and license groups identified below. This fee reflects the quantity and nature of pollutants actually discharged or licensed to be discharged. When a license authorizes the discharge of pollutants fitting more than one category, the appropriate fee is due for each license group and type of pollutant. When data are available, average daily discharge quantities are used in computing fees for conventional and non-conventional pollutants discharged from publicly-owned and industrial process wastewater sources. When data are not available, and for other pollutants and categories, fees are determined using the discharge limits established in the license. If no discharge occurs during an entire year, no discharge/license fee is assessed for that year.

License group or type of pollution	Rate
Conventional pollutants	\$1.57 per pound
Conventional pollutants, discharge rate	\$3.01 per pound
Conventional pollutants, primary treatment only	\$0.6888 per pound
Conventional pollutants, food handling or packing facilities	\$0.0627 per pound
Non-conventional or toxic pollutants	Variable*
Heat (as licensed flow x temperature x 8.34)	\$0.0564 per million BTU
Flow: fish rearing facilities	\$56.36 per million gallons
Flow: combined sewer overflows (based on treatment facility design)	\$68.88 per million gallons
Flow: non-process from industrial or commercial sources	\$219.18 per million gallons
Flow: publicly-owned treatment facilities	\$789.04 per million gallons
Flow: process from industrial or commercial sources	\$789.04 per million gallons
Flow: treated stormwater	\$21.92 per million gallons
Flow: sanitary from commercial sources	\$0.0250 per gallon
Flow: sanitary from OBD	\$0.0551 per gallon
Flow: sanitary from publicly-owned facilities less than 6,000 GPD	\$0.0236 per gallon

* For non-conventional or toxic pollutants, the license rate per pound is \$12.68 divided by the licensed effluent concentration, and the discharge rate per pound is \$25.36 divided by the licensed effluent concentration.

For the purposes of calculating a discharge or license fee, the term conventional pollutants means oxygen-demanding compounds, suspended or dissolved solids, and oil and grease, and the term non-conventional pollutants means other chemical constituents subject to fees. Excluded from fees are the following: pH, residual chlorine, settleable solids, bacteria, whole effluent toxicity tests, color, any compound without numeric license limitations, and effluent concentrations reported as being below acceptable detection limits.

Annual discharge or license fees may be calculated using either pounds of pollutants or allowable flow, as is most appropriate for the circumstances of a particular discharge category, situation or location.

I-C. A fee adjustment is assessed in consideration of the potential for water quality impact from the discharge(s) from a facility. These adjustments include the following:

- (1) For publicly-owned sanitary and industrial process wastewater sources licensed for more than 50,000 gallons per day and having initial dilutions of less than 1,000 to 1, the base fee is increased by a factor determined by multiplying the applicable base times 1.5 divided by the square root of the chronic dilution factor.
- (2) When a license authorizes multiple discharge points from the same location, an additional fee of \$43.84 is assessed for each discharge point.

I-D. The following provisions apply to all annual waste discharge license fees.

- The annual fee for existing licenses is due on the anniversary date of the license or such other date initially established by the Department. This date, once established, remains the scheduled date for payment of annual fees for that license.
- The annual fee for new applications must be estimated and paid at the time of filing.
- With the exception of transfers of licenses for discharges from residential or commercial OBDs, no additional fees are assessed for license renewals, amendments, minor modifications or other revisions.
- A fee of \$100 is required for transfer of licenses for discharges from residential or commercial OBDs.
- Failure to pay the annual fee within 30 days of the due date is sufficient grounds for revocation of the license.

II. The following fees are required for applications for property tax and sales and use tax exemption certification and for NPDES permit water quality certification.

AIS Code	Description	Processing Fee	Licensing Fee
63	property tax exemption certification	\$334	\$27
64	sales & use tax exemption certification	\$334	\$27
68	Water quality certification for a NPDES permit	-	-
