

NOTE: This map depicts areas with POTENTIAL views of the MET towers. Visibility is generated from the top of the towers at 112 m. Not all parts of a structure will be seen from each location. The map only accounts for topography and vegetation with an assumed tree height of 40 feet. The map does not account for other factors such as buildings and structures, site specific vegetation, variations in eyesight, and atmospheric and weather conditions and may overstate where the structure will be seen from. Potential viewshed is based on GIS data available at the time from USGS, Maine Office of GIS and First Wind, LLC. Data is only as accurate as the original source and is not guaranteed by LandWorks.
