

NOTE: This map depicts areas with POTENTIAL views of one or more turbine lights. Visibility is generated from the turbine hub at 94m. The map only accounts for topography and deciduous, coniferous, and mixed forest cover at an assumed height of 40 feet. The map does not account for other factors such as buildings and structures, actual tree height and density, site specific vegetation and/or removal, variations in eyesight, and atmospheric and weather conditions. Under certain conditions this map overstates where lights will be seen from. Potential viewshed is based on GIS data available at the time from USGS and First Wind, LLC. Data is only as accurate as the original source and is not guaranteed by LandWorks.

Exhibit 11: Turbine Night Lighting Viewshed Map
