

NOTE: This map depicts areas with POTENTIAL views of one or more turbines. Visibility is generated from the turbine hub at 94m. Not all turbines (or all parts of turbines) will be seen from each location. The map only accounts for topography. The map does not account for other factors such as buildings and structures, forest and trees, site specific vegetation, variations in eyesight, and atmospheric and weather conditions and may overstate where turbines will be seen from. Potential viewshed is based on GIS data available at the time from USGS and First Wind, LLC. Data is only as accurate as the original source and is not guaranteed by LandWorks.

Exhibit 2: Potential Visibility Map (Topography/from the HUB)
