

Visual Simulation of Rollins Wind Project from Madagascal Pond

Simulation prepared by LandWorks  
 Date and time: 7/29/08; 12:40 pm  
 Focal length: (35 mm equivalent): 56 mm

Post-Construction Photo of Rollins Wind Project from Madagascal Pond

Photo taken by TJDA  
 Date and time: 6/8/11; 5:04 pm  
 Focal length: (35 mm equivalent): unknown

Note: View location is slightly different for post-construction photo

**Exhibit 5: Visual Simulation and Post-Construction Photos**  
**Bingham Wind Project**

Rollins from Upper Hot Brook Lake.

From this location, the closest turbine at Rollins is approximately 2.5 miles away. Note that the rotors are difficult to discern from this distance, despite the silhouette effect present with these light conditions. Photo taken by TJDA, June 6-7, 2011.

Rollins from Upper Pond.

From this location, the closest turbine at Rollins is approximately 2.5 miles away. Note that even with a blue sky, the turbines do not stand out in this photo. Photo taken by TJDA, June 6-7, 2011.
