**Subject:** Keep Maine's Air Clean!

Dear Jeffrey Crawford,

I can't believe that the Department of Environmental Protection would even consider a plan to take most of Maine out of the Ozone Transport Region. There's no science to support this. In fact, the regional agreement has helped to improve Maine's air quality. This makes no sense and is yet another waste of taxpayer money by the current administration, which seems intent on trashing the state on its way out the door.

Sincerely,  
Ben Lund
