Subject: Pullback on air quality requirements

Dear Sir;

As a Maine resident and inhabitant of the planet Earth I call upon you, the DEP, and the powers that be to deny requests to rollback emission requirements that are underway at this moment.

Maine has the highest rate of asthma in our children. Ask a pediatrician. Many others have health concerns which would be negatively impacted by this rollback. And, who but those who stand to be enriched, would be in favor of more ground smog in their breathable air? No one!!

So very interesting that the Gold Coast of York County would be exempt! The bastion of the super rich who summer in Maine!

This repetitive story of why the rich should be allowed control over the air we breath has long been exposed for what it is: white mens belief in their superiority and that they are privileged to decide for all so they can become richer. It's old, it's wrong, and it's immoral.

If you support this rollback, you are complicit.

Thank you.
