

Appendix C

Per Acre Phosphorus Allocations for Selected Maine Lakes

The attached spreadsheet presents per acre phosphorus allocations (P) for all the lake/town combinations that have been calculated to this point. This Appendix will be modified on a regular basis as additional lake/town combinations are added and allocations are amended as new information becomes available. If you do not find the lake watershed/town combination you are looking for in the appendix, contact Jeff Dennis at the DEP Division of Watershed Management (207-287-7847 or jeff.dennis@maine.gov) to request an allocation.
