# EXECUTION OF THE AGREEMENT

This Performance Partnership Agreement (Agreement or PPA) between the Maine Department of Environmental Protection (MEDEP) and the U.S. Environmental Protection Agency, Region 1 (EPA Region 1), covers the time period from October 1, 2024, to September 30, 2028. It is consistent with the principles embodied in the U.S. Environmental Protection Agency and the Environmental Council of the States joint agreement to develop an effective National Environmental Performance Partnership System (NEPPS).

By entering into this Agreement, both agencies commit to: 1) improving communications using agreed-upon outcomes and environmental measures; 2) aligning and integrating both agencies' goals, objectives and targets; 3) investing resources in the identified Areas for Collaboration; and 4) ensuring that limited staff and financial resources are used judiciously to address the most significant environmental and programmatic issues in the state and region.

The undersigned execute this Agreement between MEDEP and EPA Region 1 for federal fiscal years 2025-2028. The Agreement, including the Areas for Collaboration, will be reviewed annually (as will the associated EPA Region 1 Priorities & Commitments Lists and MEDEP Comprehensive Work Plans), and modified as necessary to ensure that it remains relevant and up-to-date.

---

Melanie Loyzim  
Commissioner  
Maine DEP  
17 State House Station  
Augusta, Maine 04333-0017

---

David W. Cash  
Regional Administrator  
U.S. EPA Region 1  
5 Post Office Square, Suite 100  
Boston MA 02109-3912

This, the \_\_\_\_ day of \_\_\_\_\_ 2025.

This, the \_\_\_\_ day of \_\_\_\_\_ 2025.

## **II. OVERVIEW**

### **A. Guiding Principles**

The Maine Department of Environmental Protection (MEDEP) has entered into Performance Partnership Agreements (PPAs) with the Environmental Protection Agency, Region 1 (EPA Region 1) since federal fiscal year 1997. This agreement continues this process, which serves as the work plan for grants from EPA to the state covering a portion of the cost of operating MEDEP's programs, as well as pass-through funds for other related projects. The development of the combined grants simplifies grant administration, provides the opportunity to prioritize the use of these funds as set forth in the PPA and allows for fewer state and federal resources devoted to grant oversight, reporting and administration.

This agreement covers a four-year period for federal fiscal years 2025, 2026, 2027, and 2028. Beginning in fiscal year 2021, the term of the Performance Partnership Grant (PPG) and the PPA have been synced and are both on the same four-year cycle. In addition, the EPA/MEDEP Priorities and Commitment List (P&C List) has been changed from renegotiating annually to renegotiating every two years, with the opportunity to reopen during the second year for any necessary adjustments. The most recent Reopener P&C List for federal fiscal year (FY) 2025 is included in Appendix A.

### **B. Roles/Contributions of Each Agency**

In recent years, EPA Region 1 has broadened its approach in working with New England states to be a more collaborative partnership effort where EPA and the states pool their expertise and resources to work together to protect the environment and public health. Beginning in 2014, EPA has allowed for increased flexibility in states' commitments to assist states in addressing budget shortfalls, staffing challenges and emerging state priorities.

### **C. Strategic Investment/Disinvestment Process**

In previous agreements, EPA Region 1 Senior Leadership and the Commissioners of the New England state environmental agencies periodically entered into specific negotiations around high-priority, major shifts (i.e., strategic investments and disinvestments) in commitments. To date, the strategic investment/disinvestment work has given state partners the flexibility to identify priority investments and disinvestments to support the most critical environmental and public health priorities – operationalizing NEPPS in a new way. In FY 2016, all states elected not to have a separate process and that any necessary disinvestment will be addressed and documented in their respective two-year P&C Lists going forward, as well as any comprehensive work plans generated.

While the development of the FY 2025-2028 PPA did not entail a separate strategic investment/disinvestment exercise, this general approach is well embedded in the process for identifying potential Areas for Collaboration (see [Section V](#)), as well as the process for negotiating the two-year P&C Lists and any comprehensive work plans generated.

### III. MEDEP and EPA Region 1 – Strategic Priorities

This section provides summarized versions of the MEDEP and EPA Region 1 Strategic Priorities and Plans. More detailed versions of the current MEDEP and EPA Region 1 Strategic Plans are presented in the Appendices to identify the current environmental goals of both agencies.

#### A. MEDEP Strategic Priorities

MEDEP's mission is legislatively mandated to prevent, abate and control the pollution of the air, water and land. The charge is to preserve, improve and prevent diminution of the natural environment of the state. The Department is also directed to protect and enhance the public's right to use and enjoy the state's natural resources. The Department administers programs, educates and makes regulatory decisions that contribute to the achievement of this mission.

The current plan has six mutually supportive and interdependent functional goals of equal importance. Spanning the breadth of the Department's operations, these goals play an integral role in ensuring that the Department protects and restores our air, land and water; prevents pollution; promotes healthy communities and natural resources; and delivers effective and efficient services:

- **Goal 1 – Monitoring and Assessment:** Develop the information needed to understand environmental and public health conditions and issues of concern and support the development of standards that protect or restore the environment and public health.
- **Goal 2 – Standards Setting:** To establish standards that protect environmental and public health; protect and improve environmental quality; and provide guidance to the regulated community and the general public.
- **Goal 3 – Environmental Stewardship and Pollution Prevention:** To provide Maine citizens and regulated entities with information about and support toward preventing, minimizing, or eliminating pollution and improving environmental performance.
- **Goal 4 – Regulated Activity Oversight:** To maintain current and historic information regarding the environmental performance of all regulated entities that is sufficient to understand compliance status and address non-compliance in an evenhanded manner.
- **Goal 5 – Pollution Response and Environmental Restoration:** To respond quickly and effectively to incidents of pollution and bring necessary resources to bear on the tasks of restoring the environment to its previous state.
- **Goal 6 – Agency Management:** To assure that the DEP's structures, systems, personnel and financial resources are sufficient to implement Maine's environmental laws, provide expected public service, maintain accountability to state and federal funding sources, and improve organizational performance.

## B. EPA Region 1 Strategic Priorities

EPA's *FY 2022-2026 Strategic Plan* communicates the Agency's priorities and provides the roadmap for achieving its mission to protect human health and the environment. In this Strategic Plan, the Agency renews its commitment to the three principles articulated by William Ruckelshaus, who served as the EPA's first Administrator (1970 – 1973, and then again from 1983 – 1985), to: follow the science, follow the law and be transparent. The Agency also adds a fourth foundational principle: advance justice and equity. We add this principle to infuse the consistent and systematic fair, just and impartial treatment of all individuals into all EPA policies, practices and programs. These principles form the basis of the Agency's culture and will guide our operations and decision making now and into the future.

Building on work already begun under President Biden's Executive Orders (E.O.s) 13985: *Advancing Racial Equity and Support for Underserved Communities Through the Federal Government* and 14008: *Tackling the Climate Crisis at Home and Abroad*, and in alignment with the Administration's whole-of-government approach, we are charting a course in this Strategic Plan where tackling climate change and advancing environmental justice and civil rights are integral to all we do in carrying out EPA's mission.

In accordance with these priorities, we have established new strategic goals on addressing climate change and environmental justice to signal the importance of these issues. Goal 1 focuses on cutting pollution that causes climate change and increasing the adaptive capacity of Tribes, states, territories and communities, and Goal 2 focuses on achieving tangible progress for historically overburdened and underserved communities and ensuring the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income in developing and implementing environmental laws, regulations and policies. We will embed this focus into the work we do to carry out our five programmatic strategic goals for enforcement and compliance, air quality, water quality, land revitalization and chemical safety.

Our four cross-agency strategies describe the essential ways EPA will carry out our mission. These strategies include reinforcing science as foundational to Agency decision making; protecting children's environmental health; building back EPA's workforce with particular attention to equity and enhancing mission-support functions to achieve organizational excellence; and renewing our commitment to EPA's trust responsibility to Tribal nations and our engagement with Tribal, state, and local government partners, stakeholders, the regulated community and the public.

EPA's Strategic Plan includes a suite of long-term performance goals (LTPGs) that reflect the quantifiable outcomes we will achieve for each strategic objective and cross-agency strategy by 2026. LTPGs will help us understand, monitor, and tell the story of progress we are making to partners and external stakeholders, Agency employees and the public.

The EPA Strategic Plan identifies seven strategic goals to guide EPA's work, along with supporting objectives under each of the key goals:

**Goal 1: Tackle the Climate Crisis:** Cut pollution that causes climate change and increase the adaptive capacity of Tribes, states, territories and communities;

- Objective 1.1 – Reduce Emissions that Cause Climate Change
- Objective 1.2 – Accelerate Resilience and Adaptation to Climate Change Impacts
- Objective 1.3 – Advance International and Subnational Climate Efforts

**Goal 2: Take Decisive Action to Advance Environmental Justice and Civil Rights:** Achieve tangible progress for historically overburdened and underserved communities and ensure the fair treatment and meaningful involvement of all people regardless of race, color, national origin or income in developing and implementing environmental laws, regulations and policies;

- Objective 2.1 – Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels
- Objective 2.2 – Embed Environmental Justice and Civil Rights into EPA’s Programs, Policies, and Activities
- Objective 2.3 – Strengthen Civil Rights Enforcement in Communities with Environmental Justice Concerns

**Goal 3: Enforce Environmental Laws and Ensure Compliance:** Improve compliance with the nation’s environmental laws and hold violators accountable;

- Objective 3.1 – Hold Environmental Violators and Responsible Parties Accountable
- Objective 3.2 – Detect Violations and Promote Compliance

**Goal 4: Ensure Clean and Healthy Air for All Communities:** Protect human health and the environment from the harmful effects of air pollution;

- Objective 4.1 – Improve Air Quality and Reduce Localized Pollution and Health Impacts
- Objective 4.2 – Reduce Exposure to Radiation and Improve Indoor Air

**Goal 5: Ensure Clean and Safe Water for All Communities:** Provide clean and safe water for all communities and protect our nation’s waterbodies from degradation;

- Objective 5.1 – Ensure Safe Drinking Water and Reliable Water Infrastructure
- Objective 5.2 – Protect and Restore Waterbodies and Watersheds

**Goal 6: Safeguard and Revitalize Communities:** Restore land to safe and productive uses to improve communities and protect public health;

- Objective 6.1 – Clean Up and Restore Land for Productive Uses and Healthy Communities
- Objective 6.2 – Reduce Waste and Prevent Environmental Contamination
- Objective 6.3 – Prepare for and Respond to Environmental Emergencies

**Goal 7: Ensure Safety of Chemicals for People and the Environment:** Increase the safety of chemicals and pesticides and prevent pollution at the source;

- Objective 7.1 – Ensure Chemical and Pesticide Safety
- Objective 7.2 – Promote Pollution Prevention

In addition, EPA has identified three FY 2022-2023 Agency Priority Goals (APGs), which are intended to jumpstart actions and showcase progress toward Administrator Regan’s priorities:

- Phase down the production and consumption of hydrofluorocarbons;
- Clean up contaminated sites and invest in water infrastructure to enhance the livability and economic vitality of overburdened and underserved communities; and
- Housing and Urban Development (HUD) and EPA will reduce exposure to lead to protect families, particularly children, in overburdened and underserved communities.

### C. Cross-Walk Between USEPA's and MEDEP's Strategic Plans

State Goals	Goal 1: Monitoring and Assessment	Goal 2: Standards Setting	Goal 3: Environmental Stewardship and Pollution Prevention	Goal 4: Regulated Activity Oversight	Goal 5: Pollution Response and Environmental Restoration	Goal 6: Agency Management

<b>Goal 7:</b> Ensure Safety of Chemicals for People and the Environment		X	X	X		

## IV. Grants Management

### A. Budget Narrative

This Performance Partnership Agreement (PPA) covers federal fiscal years 2025-2028 (October 1, 2024, to September 30, 2028). The PPA, together with work plans (as represented by the associated P&C Lists and the related comprehensive MEDEP work plans), set forth the goals, sub-goals, objectives, programs, activities, deliverables and measures of progress to address the full range of cooperative federal-state environmental programs under the Department's jurisdiction. The Performance Partnership Grant (PPG) is a key vehicle for implementing the Agreement, in combination with other federal and state funding sources. The PPG currently combines the following federally-funded programs:

- Air Pollution Control – CAA Sec.105
- Water Pollution Control – CWA Sec.106
- Nonpoint Source Management -- CWA Sec. 319(h)
- Underground Water Source Protection – SDWA Sec. 1443(b)
- Hazardous Waste Management – SWDA Sec. 3011(a)
- Lead-Based Paint Program – TSCA Sec. 404(g)
- Toxic Substances Compliance Monitoring – TSCA Sec. 28

The Agreement and the associated work plans also include additional non-PPG funded work that is necessary to accomplish the environmental and public health goals set forth in the Department's and EPA Region 1's Strategic Plans. MEDEP and EPA Region 1 will continue to explore opportunities for grant efficiencies and measurement of environmental results.

Consistent with ***GPI 12-06, Timely Obligation, Award, and Expenditure of USEPA Grant Funds***, for multi-year awards, MEDEP should apply for the total amount of funds expected for the period covered by the award and include any required match in the application. The work plan should also cover the same time period. USEPA will fund the application incrementally as funds become available.

To be allowable under Federal awards, costs must meet the following general criteria, found in [2 CFR Part 200 \(Subpart E\)](#), Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Award:

Except where otherwise authorized by statute, costs must meet the following general criteria in order to be allowable under Federal awards:

- (a) Be necessary and reasonable for the performance of the Federal award and be allocable thereto under these principles.
- (b) Conform to any limitations or exclusions set forth in these principles or in the Federal award as to types or amount of cost items.

- (c) Be consistent with policies and procedures that apply uniformly to both federally-financed and other activities of the non-Federal entity.
- (d) Be accorded consistent treatment. A cost may not be assigned to a Federal award as a direct cost if any other cost incurred for the same purpose in like circumstances has been allocated to the Federal award as an indirect cost.
- (e) Be determined in accordance with generally accepted accounting principles (GAAP), except, for state and local governments and Indian tribes only, as otherwise provided for in this part.
- (f) Not be included as a cost or used to meet cost sharing or matching requirements of any other federally-financed program in either the current or a prior period. See also [§ 200.306\(b\)](#).
- (g) Be adequately documented. See also [§§ 200.300](#) through [200.309 of this part](#).
- (h) Cost must be incurred during the approved budget period. The Federal awarding agency is authorized, at its discretion, to waive prior written approvals to carry forward unobligated balances to subsequent budget periods pursuant to [§ 200.308\(e\)\(3\)](#).

## B. Federal Regulations and Key Policies

All categorical environmental state grants, including PPGs, are governed by [40 CFR Part 35](#), State and Local Assistance, Subpart A, Environmental Program Grants (commonly referred to as Part 35); and all grants and agreements are also subject to [2 CFR Part 200](#) and [2 CFR Part 1500](#), Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. PPGs and PPAs do not supersede any laws, regulations or delegation agreements.

Some environmental program grants are awarded through a competitive process. An applicant and the Regional Administrator may agree to add funds available for a competitive grant to a Performance Partnership Grant. If this is done, the work plan commitments that would have been included in the competitive grant must be included in the Performance Partnership Grant work plan. After the funds have been added to the Performance Partnership Grant, the recipient does not need to account for these funds in accordance with the funds' original environmental program source, but remains accountable for delivering on work plan commitments.

*Programmatic requirements.* In order to include funds from an environmental program grant listed in [§35.101](#) of this subpart in a Performance Partnership Grant, applicants must meet the requirements for award of each of the environmental programs from which funds are combined in the agency's Performance Partnership Grant, except the requirements at [§35.268\(b\)](#) and [\(c\)](#); [35.272](#); and [35.298 \(c\), \(d\), \(e\) and \(g\)](#). These requirements can be found in the CFR beginning at [§35.140](#).

PPG work plans are subject to the same requirements as any other grant work plan. The requirements can be found at [40 CFR 35.107](#). An approvable work plan must specify the following:

- The work plan components to be funded under the grant;
- The estimated work years and the estimated funding amounts for each work plan component;
- The work plan commitments for each work plan component and a time frame for their accomplishment;

- A performance evaluation process and reporting schedule in accordance with [40 CFR 35.115](#); and
- The roles and responsibilities of the recipient and USEPA in carrying out the work plan commitments.

The work plan must also be consistent with applicable federal statutes, regulations, circulars, Executive Orders, and USEPA delegations, approvals or authorizations. The PPA or portion thereof that serves as a grant work plan must meet the same work plan requirements as for any state program grant. The portion(s) of a PPA that serve as a work plan must be clearly identified and distinguished from the rest of the PPA. The regulation at [40 CFR 35.107\(c\)](#) states:

“An applicant may use a Performance Partnership Agreement or a portion of a Performance Partnership Agreement as the work plan for an environmental program grant if the portions of the Performance Partnership Agreement that serve as all or part of the grant work plan: (1) Are clearly identified and distinguished from other portions of the Performance Partnership Agreement; and (2) Meet the requirements in [§35.107\(b\)](#). A PPG work plan should be the product of joint planning, priority setting and mutual agreement between the state and USEPA. The PPG grant work plan is the result of negotiations between USEPA and state program managers and staff. Successful PPG work plan negotiations rely on a predictable process that fosters prompt resolution of issues, including elevation of issues to senior management levels if necessary. In successful work plan negotiations USEPA and the state will reach a mutual understanding and agreement about what will be accomplished under the agreement.”

**Opportunities for Grant Process Streamlining (GPI 12-06, Timely Obligation, Award, and Expenditure of USEPA Grant Funds):**

- **Estimating Budgets:** Consistent with applicable National Program Managers (NPM) Guidance, USEPA should request states to develop and/or submit their work plans and applications based on the previous year’s award amount or the amount derived from the President’s budget, whichever is higher. If amounts based on the President’s budget are not known, negotiations should be based on the previous year’s award amount.
- **Focus Negotiations on New Priorities:** Assuming that the level of funding is not significantly different from the previous year’s grant amount, the primary focus of work plan negotiations should be on new priorities consistent with applicable NPM guidance. Less emphasis should be placed on negotiating recurring activities/commitments where there is a satisfactory record of grant performance.
- **Multi-Year Grant Awards:** For multi-year grant awards, applicants should apply for the total amount of funds expected for the period covered by the award and include any required match in the application. The work plan should also cover the same time period. USEPA will fund the application incrementally as funds become available.
- **Pen and Ink Changes:** If the final amount of funding is lower than the amount applied for, regions will work with states to identify necessary changes. The state will not need to submit a revised work plan or new application. Regions will document and date through pen and ink changes/email correspondence agreed-upon revisions to the work plan, budget narrative and application forms.

## **Environmental Results (USEPA Order 5700.7, Environmental Results Under USEPA Assistance Grants)**

[USEPA Order 5700.7](#) directs program offices to ensure that the work plan contains well-defined outputs and outcomes. For state assistance agreements under 40 CFR 35, Subpart A, program offices may satisfy this requirement by ensuring compliance with 40 CFR 35.107 as stated above. Prior to approving an assistance agreement work plan, program offices must ensure that they can link the work plan to USEPA's Strategic Plan architecture.

The term "output" in USEPA Order 5700.7 means an environmental activity, effort and/or associated work product related to an environmental goal or objective that will be produced or provided over a period of time or by a specified date. Outputs may be quantitative or qualitative but must be measurable during an assistance agreement funding period.

The term "outcome" means the result, effect or consequence that will occur from carrying out an environmental program or activity that is related to an environmental or programmatic goal or objective. Outcomes may be environmental, behavioral, health-related or programmatic in nature, must be quantitative and may not necessarily be achievable within an assistance agreement funding period. Note: These terms and their uses are similarly defined in [40 CFR 35.102](#).

### **C. Range of Activities**

MEDEP will use the Performance Partnership Grant, subject to the requirements below, to fund any activity that is eligible for funding under at least one of the environmental programs from which funds are combined into the grant.

MEDEP will use the Performance Partnership Grant to fund multi-media activities that are eligible and have been agreed to by the Commissioner and the Regional Administrator. The range of activities vary as needed by program but may include staff time for program design and implementation to achieve measurable environment and public health results. Examples of activities include multi-media permitting and enforcement, pollution prevention, sampling, analysis, ecosystem management, community-based environmental protection and/or other innovative approaches and activities.

### **D. Work Plan Development Process**

Starting with FY 2016, USEPA released a two-year NPM Guidance planning process and encouraged the regions and the states to move towards multi-year work plans. For FY 2016 and FY 2017, EPA Region 1 and the Region 1 states agreed to pilot an online (via a Microsoft SharePoint site), two-year P&C List process for documenting negotiated Performance Partnership Grant commitments for the time period FFY 2016-2017. Under this approach, there is an expectation that the negotiated work plan commitments will cover a two-year period absent changed circumstances, as defined below. The benefits of this approach include minimizing/eliminating the need for extensive work plan negotiations at the mid-point of a two-year cycle, with recurring commitments from year one typically carrying over into year two. This approach should also better align the priorities communicated through the NPM and individual programmatic grant guidances with the commitments and flexibilities negotiated in grant work plans.

Adjustments to year-two commitments will be necessary if there are changed circumstances such as changes in Administrator/NPM priorities, revisions required by USEPA’s Annual Commitment process, a substantial reduction or increase in USEPA funding and similar issues experienced at the state levels.

## **E. Reporting & Measures for Evaluating Performance**

For this Agreement, the Department will continue to produce regular (at least annual) status reports for the elements outlined in the P&C Lists, and status reports for identified Areas for Collaboration. MEDEP and EPA Region 1 agree to meet as needed to discuss progress and address any areas of concern.

MEDEP annual assessments (also known as “End-of-Year” Progress Reports) will strive to summarize results, track progress on identified P&C List Commitments and Areas for Collaboration, and identify areas where progress met or exceeded expectations, as well as areas where there may have been difficulty in achieving projected outcomes.

MEDEP and EPA Region 1 agree to develop (and to continuously improve) a process for jointly evaluating and reporting progress and accomplishments that comply with [40 CFR Part 35.115](#).

## **V. Areas for Collaboration**

### **A. Areas for Collaboration Development Process**

Key Areas for Collaboration (AFCs) between EPA and the states are included in each multi-year PPA. In order to maintain a high level of attention on the new AFCs and to gain the greatest benefits of a cooperative, problem-solving approach, close communication between both agencies is necessary throughout the Agreement period. Appropriate staff from the two organizations will provide coordinated, narrative updates to senior leadership at least annually to ensure that desired progress is being made on the selected AFCs. At the end of each year, the Areas for Collaboration will be reviewed and amended, as necessary. As appropriate, the organizations will work together to identify specific priority projects to be included on the Priorities and Commitments Lists.

It should be emphasized that exclusion of a particular issue or program area from the “Areas for Collaboration” section does not indicate a low priority or that significant work is not being accomplished in that area. All core MEDEP and EPA Region 1 services are ongoing and remain essential to protecting the environment and public health in Maine and in New England.

### **B. Description of Areas for Collaboration**

#### **Environmental Justice**

MEDEP, through the FY 2025-2028 PPA, continues to ensure that environmental justice (EJ) is an integral consideration in the development and implementation of all its media programs.

MEDEP is committed to the fair treatment and meaningful involvement of all of its residents and believes that Environmental Justice will engage and reach all people regardless of race, color, national origin, English language proficiency or income with respect to the development, implementation and enforcement of environmental laws, regulations and policies.

MEDEP addresses inequities by providing historically disenfranchised communities opportunities to learn and be meaningfully involved in projects that will impact their quality of life and the environment. MEDEP believes that environmental justice will be achieved when everyone enjoys a fair share of environmental benefits and the same degree of protection from environmental and health hazards, as well as access to materials, taking into account limited English proficiency and equal access to the decision-making process to help ensure a healthy environment in which to live, learn, work and play.

There is a growing body of evidence that minority and lower-income citizens, neighborhoods or communities have faced an inequitable share of the risks associated with environmental hazards. This applies both to urban areas as well as rural and more remote communities in Maine. The core issue is the fairness in siting, monitoring, and/or clean-up of facilities and the regulation of activities that represent environmental hazards and increased focus on improving the quality of the environment and public health in areas that may not have traditionally benefited from past approaches. MEDEP will work with EPA Region 1 to meet the priorities and goal of the Justice40 Initiative, with at least 40 percent of the overall benefits of qualifying federal EPA investments flowing to disadvantaged communities that are marginalized, underserved and overburdened by pollution in Maine as outlined in Executive Order 14008.

MEDEP is committed to working with EPA Region 1 to jointly collaborate on environmental and public health projects including, but not limited to, lead education and enforcement issues posed by older housing stock in underserved rural areas of the state including Washington and Aroostook Counties and population centers including Portland and Lewiston. MEDEP will continue participation in core state engagement activities with EPA Region 1 including but not limited to regular state engagement, all state meetings and regular gatherings of the Northern New England EJ coalition bringing together state environmental agencies from Maine, Vermont and New Hampshire. MEDEP also agrees to collaborate to support the needs of federally recognized Tribal Nations in Maine. Joint activities include community engagement, identifying key local environment and public health priorities and identifying opportunities to focus available state and federal resources (e.g., education, outreach, training, compliance assistance, sampling, funding, etc.) to improve the quality of the environment and public health.

## **Addressing Climate Change**

Maine will continue to experience a range of impacts from climate change including increases in air and water temperature, changes to precipitation patterns, sea level rise (SLR), more intense weather events and flooding, and seasonal shifts. The impacts of climate change are already affecting the lives and livelihoods of our residents and visitors, degrading ambient and indoor air quality, threatening public health, and damaging infrastructure, ecosystems, and social systems. As a result, there is broad consensus of the need to holistically address mitigation of greenhouse gas emissions to limit the magnitude and rate of climate change while also adapting to those impacts that are unavoidable. This approach should be integrated across all programs and media to the greatest extent possible.

MEDEP has been actively engaged in addressing climate change, including through MEDEP's Commissioner co-chairing the Maine Climate Council (38 MRS 577-A), which leads state efforts on climate change. The Climate Council adopted Maine Won't Wait: A Four-Year Plan for Climate Action December 1, 2020, and recently adopted the four-year update to this plan effective November 21, 2024. Department staff across air, water, land, and remediation and waste management programs support all Maine Climate Council subcommittees, working groups and related task forces and are taking a cross-departmental approach to incorporate climate change into monitoring, regulatory and funding programs to ensure they are responsive to Maine's climate action needs. For example, MEDEP's monitoring and assessment reports help the state understand changes in air, land and water quality over time so programs are better informed to take actions that reduce climate impacts. Staff from across the department contributed findings to the Scientific Assessment of Climate Change and its Effects in Maine reports (2020 & 2024) that provided the scientific basis for strategies in the Maine Climate Action Plan. The Maine Climate Council also has an equity subcommittee to ensure strategies support the greatest number of individuals possible. Related to this work, but outside the scope of the PPA, Maine is using the EPA Climate Pollution Reduction Grants to support several policy analyses of the 2024 plan, including a completed analysis of Maine's waste sector emissions through Food Loss and Waste assessment.

MEDEP is charged with adopting rules to assure compliance with greenhouse reduction targets established in statute (576-A), which include gross reduction targets for 2030, 2040 and 2050, and to achieve carbon neutrality by 2045. Chapter 167, Tracking and Reporting Gross and Net Annual Greenhouse Gas Emissions, effective 2021 and amended 2024, standardized protocols for incorporating blue carbon into Maine's greenhouse gas inventory. A significant source of Blue Carbon data is from the Northeast Ocean Data Portal, maintained by the Northeast Regional Ocean Council in coordination with US EPA Region 1 and the Coastal Vegetation & Blue Carbon Work Group. In March 2021, Maine, along with ten other Northeast states, began working with US EPA Region 1 and US EPA Office of Research and Development to develop the first Consumption-Based Emissions Inventory (CBEI) to the Department's Biennial Report on Progress toward Greenhouse Gas Reduction Goals by 2028. Finally, Maine's greenhouse gas reduction goals are consistent with the first subnational Regional Climate Change Action Plan created by the New England Governors and Eastern Canadian Premiers, first adopted in 2001 and updated in 2017. Annual conferences of the NEG ECP focus consistently on climate change, energy, trade, ecological connectivity, hazard mitigation and adaptation, and are often attended by US EPA Region 1.

MEDEP and EPA share a common goal to tackle the climate crisis. Continuous coordination and communication can enhance and complement each agency's efforts. Meetings such as the New England State Climate Coordinator calls allow for peer-to-peer learning and discussion of barriers and lessons learned, as well as present new opportunities for interstate collaboration. EPA and MEDEP shall continue this dialogue and evaluate the need for additional options.

**What a Successful Environmental, Public Health or Efficiency Outcome Looks Like:**

- Continued communication between MEDEP and EPA to share successes and lessons learned regarding climate resilient actions and GHG reductions;
- Collaboration within agencies in your state and across different states to consider how climate change may affect their work and any adaptive measures that may be taken to mitigate those vulnerabilities;

- Collaboration within MEDEP programs to ensure that the agency’s outreach and education activities, loan and grant programs, rules and regulations, and public policy positions account for changing climatic and environmental conditions as well as minimize GHG emissions; and
- Continued education and engagement with communities—especially those most vulnerable to the impacts of climate change—to help respond to changing environmental conditions.

**Planned Actions:**

MEDEP will participate in quarterly New England State Climate Coordinator calls and similar meetings to increase collaboration and communication on priorities and implementation strategies among state agencies and EPA.

MEDEP will coordinate with EPA on the implementation of the EPA Region 1 Climate Adaptation Plan Priority Actions, as appropriate, including:

- MEDEP will consider conducting water quality monitoring more frequently and in more locations to determine whether designated uses are attained and to document changes in climate conditions to inform water quality standard revisions and, if necessary, “Use Attainability Analyses” (UAAs), and
- MEDEP will use the best available scientific information on changes to wetlands ecosystems when making jurisdictional determinations.

MEDEP will use the latest data to consider future site conditions and suitability, especially impacts from climate change that may impact state investment across all programs in this PPA, as appropriate.

MEDEP, in collaboration with EPA, will increase community resilience through natural hazard prevention, planning, and response.

MEDEP will continue to participate in the Regional Greenhouse Gas Inventory.

MEDEP will collaborate with EPA on voluntary energy reduction strategies. As resources allow, MEDEP will encourage communities and facilities to use EPA tools to reduce their energy consumption.

MEDEP will continue to provide assistance to wastewater treatment and drinking water facilities on:

- designing water systems upgrades and protecting existing infrastructure and water quality impacted by all hazards and extreme events, and
- increasing energy efficiency and renewable energy generation and use.

MEDEP will collaborate with EPA to support communities in analyzing local risks and vulnerabilities, design and implement mitigation strategies, and support emergency response capabilities, to minimize the negative effects of climate changes on infrastructure, public health and natural systems.

MEDEP will partner with EPA to strengthen watershed management practices through examination of policies, regulations and standards to advance restoration actions and protect water quality impacted by climate hazards.

29	Goal 5: Ensure Clean and Safe Water for All Communities, Objective 5.2: Protect and Restore Waterbodies and Watersheds		Revise/reissue state general permit for Industrial Stormwater incorporating federal MSGP requirements	Revise/reissue state general permit for Industrial Stormwater incorporating federal MSGP requirements	Gregg Wood, 287-7693 Laura Crossley 615-6711	Manager: Damien Houlihan - 1586			

30	Goal 5: Ensure Clean and Safe Water for All Communities, Objective 5.2: Protect and Restore Waterbodies and Watersheds		When developing new MS4 permits, document state's ability to fulfill all requirements specified in federal MS4 regulatory requirements under either MCGP or Chapter 500, Stormwater Management, or directly in the MS4 permit.	When developing new MS4 permits, document state's ability to fulfill all requirements specified in federal MS4 regulatory requirements under either MCGP or Chapter 500, Stormwater Management, or directly in the MS4 permit.	Robert Wood 855-8361 Gregg Wood 287-7693	Manager: Damien Houlihan - 1586				
31	Goal 5: Ensure Clean and Safe Water for All Communities, Objective 5.2: Protect and Restore Waterbodies and Watersheds		Per the FY23 PQR, Maine shall correct the deficiencies in the MS4 General Permit by taking one of the following actions by 6/30/24: 1. MEDEP can revoke approval of the model LID ordinances submitted by those permit holders that did not contain clear, specific and measurable terms for each LID measure found in Table 1 of Appendix F of the MS4 General Permit and issue new approval letters that contain performance standards for each LID measure found in Table 1 of Appendix F of the MS4 General Permit that those permit holders must adopt in their LID ordinance as required by the MS4 General Permit 2. Modify the MS4 General Permit to contain performance standards for each LID measure found in Table 1 of Appendix F of the MS4 General Permit that all permit holders must adopt in their LID ordinance 3. Some other action approved by EPA.	Implement the MS4 General Permit as corrected in accordance with the federal regulations.	Gregg Wood 287-7693	Manager: Damien Houlihan - 1586				
32	Goal 5: Ensure Clean and Safe Water for All Communities, Objective 5.2: Protect and Restore Waterbodies and Watersheds		As resources permit, provide draft and final general permits on public web-site. Make available state-issued GPs, the covered GP permittees, the dates of authorization for each permittee, and possibly the NOIs for each GP.	As resources permit, provide draft and final general permits on public web-site. Make available state-issued GPs, the covered GP permittees, the dates of authorization for each permittee, and possibly the NOIs for each GP.	Gregg Wood 287-7693 Laura Crossley 615-6711	Manager: Ellen Weitzler -1582				
33	Goal 5: Ensure Clean and Safe Water for All Communities, Objective 5.2: Protect and Restore Waterbodies and Watersheds		Per the FY23 PQR, Maine shall complete an acceptable and current application for NPDES authorization CWA 316(b), including appropriate rules, (all Maine MEPDES rules updated to be consistent with federal requirements), an updated Program Description, an amended NPDES MOA, and an updated AG Statement to obtain authorization to regulate cooling water intake structures. Maine shall complete the application materials and submit to EPA no later than 12/31/24.	If not authorized in FY24, Maine shall continue to work with EPA to revise the application for NPDES authorization CWA 316(b) and seek to rectify deficiencies as soon as practicable to facilitate authorization no later than FY25.	Gregg Wood 287-7693 Matt Hight 719-0703	Manager: Ellen Weitzler -1582				
34	Goal 5: Ensure Clean and Safe Water for All Communities, Objective 5.2: Protect and Restore Waterbodies and Watersheds		After DEP's CWA §316(b) implementation rules are approved by EPA, for permittees subject to CWA §316(b), ME DEP will provide timely information to the federal Endangered Species Act (ESA) Services (NOAA and USFWS), or to EPA to forward to the Services, including permit applications for a 60 day review, as provided in the new Cooling Water Intake Structure (CWIS) Existing Facility Rule. Prior to EPA approval of Maine's implementation rules, DEPs obligation under this requirement is limited to providing any cooling water discharge applications to EPA as they may trigger 316(b) requirements.	After DEP's CWA §316(b) implementation rules are approved by EPA, for permittees subject to CWA §316(b), ME DEP will provide timely information to the federal Endangered Species Act (ESA) Services (NOAA and USFWS), or to EPA to forward to the Services, including permit applications for a 60 day review, as provided in the new Cooling Water Intake Structure (CWIS) Existing Facility Rule. Prior to EPA approval of Maine's implementation rules, DEPs obligation under this requirement is limited to providing any cooling water discharge applications to EPA as they may trigger 316(b) requirements. 1	Strategy 4: Strengthen Tribal, State, and Local Partnerships and Enhance Engagement (ALL GOALS AND OBJECTIVES)		The Regional Office will strive to honor the spirit of the PPA. In keeping with this spirit the Region will work with EPA HQ to limit the impact of unexpected demands on the states. To address new, very high priority issues that might emerge a re-opener clause will be included as part of this process permitting the Regional Office and/or the state to introduce necessary changes to the PPA. 5	Goal 2: Taking Decisive Action to Advance Environmental Justice and External Civil Rights		MEDEP will work with the EPA on priority projects and activities in Portland, Lewiston and the mobile home/manufactured housing sector as initial communities and priority sectors with potential environmental justice concerns. EPA and federal EJ mapping tools will also be utilized to identify communities with potential environmental justice concerns in rural northern and eastern parts of Maine and determine the prioritization of urban versus rural EJ work for FY24-25. Once these communities are identified, EPA and MEDEP will develop strategies to reduce disparities and improve the quality of the environment and public health in priority areas as appropriate and as resources allow. Strategies will be developed to create a better overall understanding of the issues facing rural priority communities and how increased outreach and capacity building can be implemented. 12	Strategy 1: Ensure Scientific Integrity and Science-Based Decision Making (ALL GOALS AND OBJECTIVES)		The US EPA and the New England states have established a biannual meeting, the QA Roundtable Meeting, for the Quality Assurance (QA) representatives from EPA and the states. The group meets in various locations, depending on whether a state or EPA is hosting the meeting. The meetings are opportunities to share and discuss common approaches to implementing quality assurance. As appropriate and as resources allow, each state is expected to attend in order to establish effective QA programs in each state and meet the obligations of the PPA.
