

NOTICE

The Maine Department of Environmental Protection (MDEP) is developing a list of Professional Engineers who are available to assist aboveground oil storage facility owners in developing and implementing Spill, Prevention, Control and Countermeasures (SPCC) plans for their facilities pursuant to 40 CFR Part 112 of the federal regulations. The list is being developed solely as a service for facility owners, and inclusion on the list does not represent endorsement by the MDEP. Inclusion on the list is available to any Professional Engineer, registered in the State of Maine, who wishes to be placed on the list and is available to assist with SPCC planning and implementation. If you are a Professional Engineer, registered in the State of Maine, and would like to be placed on this list, please contact:

Sara L. Brusila, Environmental Specialist
Maine Department of Environmental Protection
Bureau of Remediation & Waste Management
Division of Technical Services
17 State House Station
Augusta, ME 04333-0017
