

Maine Oil Recycling Program Directory Revised November, 2006

Maine Oil Recycling Program (MORP)

The Maine Oil Recycling Program (MORP) was initiated to promote better management of used motor oil through recycling. In recent years, due to escalating costs, many people have started to change their own automotive oil. MORP is directed toward this do-it-yourself (DIY) oil changer because many DIY's are unaware of the potential hazards of improper oil disposal. MORP gives them an opportunity to help promote energy conservation and enhance environmental quality.

Most people respect the environment and have supported various programs to conserve or improve its quality. However, some people are unaware when they change their own oil that a product which is harmful to our environment is generated which must be disposed of properly. Uncaring individuals might set it out with the trash, take it to their local landfill, draining it down a nearby storm sewer, or dump it in a vacant lot. These practices are not only wasteful and create a potential threat to the environment, but are also illegal. Recycling offers the best alternative.

Under the Maine Oil Recycling Program (MORP), the Department of Environmental Protection encourages you to properly dispose of your used oil. To promote resource conservation and environmental protection, please drain your oil into a plastic container and deliver to the nearest collection center. In order to assist MORP, the businesses listed in this directory have volunteered to act as collection stations. When you change your oil, you may bring it to one of these locations. Check the MORP directory for the most convenient center in your area or call the Department at 207-287-2651.

We hope that after reading this description you will participate in this program to help conserve energy and protect Maine's environment.

WHY?

1. IT REDUCES ENVIRONMENTAL POLLUTION

Used oil is a potential pollutant of Maine's environment and drinking water supplies. It contains harmful contaminants, some of which are hazardous to human health. Oil dumped down storm sewers is carried to the nearest stream, river or lake. Oil that is sent to a landfill or dumped on the ground may end up in waterways or water supplies. Improper disposal of waste oil is a violation of state law. Proper disposal of used oil at a recycling center helps protect Maine's environment and maintain quality drinking water.

2. IT SAVES A VALUABLE RESOURCE

Every gallon of oil that is discarded is another gallon that must be refined from a finite world supply of crude oil. Recycling used oil saves these resources. Used oil is relatively inexpensive to refine into clean lubricating oil. Also, used oil (free of harmful contaminants) is an efficient energy source when burned. Even the smallest amounts are important –it all adds up.

RECYCLE!

GUIDELINES FOR RETURNING YOUR USED OIL

- If possible, please return used oil during non-rush periods of business.
- Please return oil in a non-breakable, closed plastic container (for example, an empty bleach bottle).
- Please take container with you after depositing your oil.
- Deposit only used crankcase oil and transmission fluids.

NOTE: Battery acids, gasoline, antifreeze and other similar materials are not to be deposited at these collection sites. The only exception is for a collection center which has a separate antifreeze collection container.

PRECAUTIONS YOU SHOULD FOLLOW

- Avoid prolonged skin contact with used motor oil.
- Remove motor oil from skin by washing thoroughly with soap and water; a waterless hand cleaner is an effective cleansing aid.
- Do not use gasoline, thinners, or solvents to remove oil from skin.
- Avoid prolonged skin contact with oil-soiled clothing, and wash soiled clothing before re-use.
- Discard oil-soaked shoes and unwashable articles of clothing.

IF YOU SEE AN OIL SPILL, PLEASE REPORT IT TO THE DEPARTMENT OF ENVIRONMENTAL PROTECTION SO THAT IT CAN BE CLEANED UP BEFORE IT CAUSES FURTHER DAMAGE.

IMPORTANT TELEPHONE NUMBERS

**To Report an Oil Spill
1-800-482-0777**

**For Information about MORP:
207-287-2651**

**For Environmental Assistance:
207-287-2651**

**Maine State Police:
1-800-452-4664**

RETURNING USED ANTIFREEZE

- Contact the business by phone, if possible, to make sure used antifreeze is being accepted.
- Please return used antifreeze in its original container or a non-breakable container such as plastic.
- Do not mix used antifreeze with any other liquid wastes at home or at the collection site. Mixing antifreeze with used oil adds to the expense for disposal. Used oil mixed with antifreeze cannot be used as a fuel supplement without treatment.

**MAINE OIL RECYCLING PROGRAM
DIRECTORY**

*This information is accurate as of August 2006.
Please call the facility directly for questions,
hours, or to check on any changes to their
acceptance procedures.*

Androscoggin County

Auburn Public Works
296 Gracelawn Rd
Auburn, ME 04210
207-783-1733
