

WASTE OIL PREMIUM

This facility allocates \$1 for each oil change (up to \$3 for larger vehicles) to pay for the cleanup cost of certain waste oil sites across Maine. These sites were contaminated by waste oil and other chemicals between 1953 and 1981 and are being cleaned up to protect the groundwater and the public's health.

This premium was established by Public Law 2007 Chapter 464 which was passed by the Legislature and is effective October 1, 2007.
