Response Strategy Type

Type of Boom

Total Length of Boom feet Unless otherwise indicated, the boom length given is straight line distance as measured on the map. Actual length required will vary with conditions, and increase with current.

Strategy Implementation

Deploy two 900' sections of boom overlapping each other from the Wiscasset Boat Ramp in a south southeast direction to the center of the river. Deploy two other overlapping 900' sections of boom from the shore south of the Route 1 bridge on Davis Island. Deploy in such a way to form a chevron/apex configuration.
