

Tony Forti, NY
Eric Frohberg, ME
Sharee Rusnak, CT

11/21/05

Discussion of most recently circulated draft:

Comments from Tony –

for NY - description of advisory – folks in NY makes more recommendations – thinking more legalistically. Tony will do a few edits and send to me.

In table: ARL – define ARL as cancer risk in tables. Eric will change the tables from “Acceptable Risk Level” to “Acceptable Cancer Risk Level”. Tony will also make edits to the language on the table under NY. Eric pointed out the point here is to describe how things currently are – Everyone’s recommendations are these are open to change based on the results of this effort

Sharee – no comments at this point. Will send comments by Monday.

Eric will bug Joe to get a write up by Monday.

One more draft. Comfortable being posted? Tony – yes. Sharee, ok. So, post by Next week.
