Subject: Product Registration, Tuf-Tite Septic Tank Risers, Distribution Boxes, and Effluent Filters

Dear Mr. Houser:

The Division of Environmental Health has completed a review of a registration application for your company's product. This information was submitted pursuant to Section 1802 of the Maine State Plumbing Code, Subsurface Wastewater Disposal Rules (Rules), for code registration, for use in Maine.

The Tuf-Tite product line consists of the following molded plastic items, along with various accessories such as, but not limited to, adapter plates and attachment devices:

Product	Model	NSF Approved
Riser Lid	12-RISL	not applicable
Tank Riser	12-RIS	not applicable
Tank Riser	12x12-RIS	not applicable
Riser Lid	16-RISL	not applicable
Accessory	16-RIS Safety Pan	not applicable
Tank Riser	16-RIS	not applicable
Tank Riser	16x12-RIS	not applicable
Riser Lid	20-RISL	not applicable
Tank Riser	20-RIS	not applicable
Tank Riser	20x12-RIS	not applicable
Accessory	20-RIS Safety Pan	not applicable
Riser Lid	24-RISL	not applicable
Tank Riser	24-RIS	not applicable
Tank Riser	24x12-RIS	not applicable
Accessory	24-RIS Safety Pan	not applicable
Accessory	24-RISLID Safety Pan Riser Lid	not applicable
Distribution Box	4HD2	not applicable
Distribution Box	6HD2	not applicable
Distribution Box	7HD2	not applicable
Distribution Box	9HD2	not applicable
Drop-Box	Various	not applicable
Effluent Filter	EF-4	Standard 46 Approved
Effluent Filter	EF-6	Standard 46 Approved

Page 2, Letter to Tuf-Tite Inc.

On the basis of the information submitted, the Division has determined that the products noted above are acceptable for use in the State of Maine, provided that it is installed, operated, and maintained in conformance with the manufacturer's directions.

Because installation and owner maintenance has a significant effect on the working order of onsite sewage disposal systems, including their components, the Division makes no representation or guarantee as to the efficiency and/or operation of the products noted above. Registration of the products noted above for use in the State of Maine does not represent Division preference or recommendation for these products over similar or competing products.

If you have any questions please feel free to contact me at (207) 287-5695.

Sincerely,

A handwritten signature in cursive script that reads "James A. Jacobsen". The signature is written in black ink and is positioned above the typed name and title.

James A. Jacobsen, Environmental Specialist IV
Wastewater and Plumbing Control Program

Effluent Filters

Tuf-Tite® Effluent Filters.

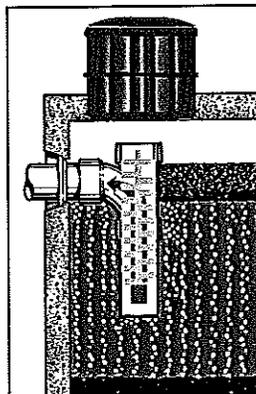

Patent Numbers
6,319,403; D 431,629; other
pats. pending.

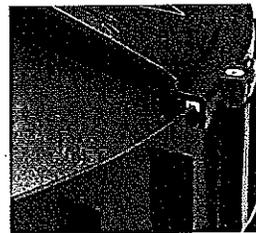

Tough Problem

Solids entering the septic field significantly reduce the life of the field, resulting in premature failure of the entire system.

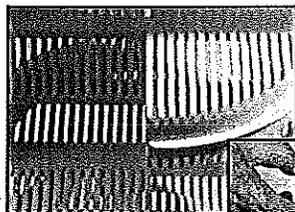

TUF-TITE Solution

The EF-4 Effluent Filter, filters solids down to 1/16", increasing the life of your septic system.

Molded-in lid gasket.

No fighting with flimsy foam rubber gaskets. Assures a watertight seal every time.

Rear of EF-4 filter - close-up.

Optional Gas Baffle for EF-4 for extended filter life.

Screws on outside of Riser, where they belong, away from corrosive gases.

EF-4 NSF® ANSI/NSF Standard 46
EF-6

TB-4 NSF® ANSI/NSF Standard 46
TB-6

Every filter needs a Riser

for easy cleaning and inspection. Stackable, interlocking Risers make filter maintenance easy. Available in 12", 16", 20", and 24" diameters.

TUF-TITE®

Installation & Maintenance: EF Series

Installation:

Tuf-Tite Effluent Filters are designed to extend the life of your drainfield by preventing solids from leaving the septic tank. The filter fits into either a 4" or 6" Tee Baffle which in many cases is already attached to the outlet pipe. If a Tee Baffle is not installed, install as shown in Figure 2, allowing enough clearance from the end of the tank to permit easy filter access.

1. Insert the filter into the Tee Baffle with arrow on the top of the filter pointing toward the outlet pipe (as shown in Figure 1 and Figure 2).
2. Push down firmly until top of the filter seats into hub of the Tee Baffle.

Maintenance:

Tuf-Tite Effluent Filters will, under normal conditions, operate efficiently for several years or more before requiring removal and cleaning. It is suggested that the unit be cleaned every time the tank is pumped or at least every three years.

1. Do not use plumbing during filter cleaning.
2. Pull the filter straight out of the Tee.
3. Hose filter off, making sure that all solids fall back into the septic tank, not back into the Tee Baffle.
4. Replace filter as in installation instructions above.

For replacement parts and warranty information, contact Tuf-Tite, Inc. 800-382-7009

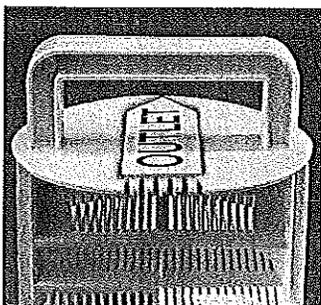

Figure 1:

Arrow on top of filter unit must point in the direction of the outlet pipe. Top rim of filter will seat in hub of Tee.

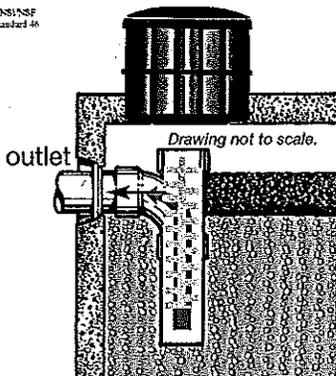

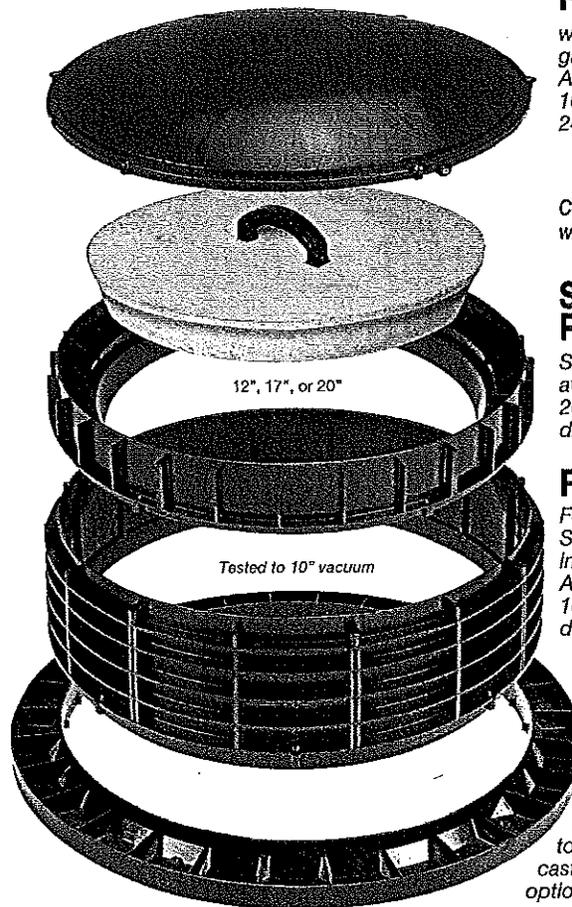

Figure 2:

Diagram of installed filter and Tee Baffle. Note: drawing is not to scale.

The Tuf-Tite® Riser System:

Riser Lid

with Molded-in gasket.
Available in 12", 16", 20" and 24" diameters.

Concrete Lid with handle
