

OAKSON, INC.

Drip Dispersal & Water Reuse...Solutions For All Sites

You're Invited !!!

Environmentally Beneficial and Innovative Technologies:

Perc-Rite Drip Dispersal & Rainwater Capture Systems – A Start to Your Sustainable Future

Learn about two very innovative products on the market: **The Perc-Rite® Drip Dispersal System** is now fully approved **in Maine** as well as Massachusetts, New Hampshire, Vermont, & Rhode Island (and 32 other states & Canada) and has quickly become a superior & permanent solution for wastewater disposal. In use 30 years, this tried & true technology is **the only approved drip system which can be used for septic tank effluent or treated effluent for new construction or repairs.**

The **Perc-Rite System** is an excellent solution for homes, campgrounds, waterfront property, wooded sites, athletic fields, golf courses, ski resorts, and environmentally sensitive areas; especially those needing to retain their aesthetic value. With Perc-Rite, there's no need to cut down trees, excavate, or disturb the environment. Installation is benign and leaves the site virtually undisturbed.

The **RainKeeper® rainwater capture system** is an easy, affordable, and great way to harvest and reuse our most precious resource...water. With global water shortages and municipal bans, capturing rainwater is prudent. This environmentally beneficial option is available for residential or commercial sites.

There is no fee to attend; light refreshments will be served. Sessions fill quickly; reserve your space now!

(Note: This is a partial listing of seminars...visit www.oaksoninc.com for other New England locations/dates)
