Resource Center

Maine Joint
Environmental
Training
Coordinating
Committee

\$75 per person, per class.

Fee includes **training material, lunch, and breaks.**

Note: There will be NO SPO subsidy for CEO's and LPI's this year.

A cancellation fee of \$25 will be charged if you do not provide notice of cancellation 48 hours prior to the day of the program.

Returned check subject to \$15 fee.

To avoid a \$15 late fee, please register before the deadline indicated.

Registration Hours: 8:00 AM – 8:30 AM

Workshop Hours: 8:30 AM – 4:00 PM

Lunch: Provided at all programs

Certification:

A JETCC certificate of participation will be issued to those who attend and complete a workshop. Six and one-half Training Contact Hours will be awarded. This will apply to re-certification for LPIs and CEOs as well as towards the Maine DHHS and DEP Voluntary Certification Program for Septic System Installers & Contractors.

Instructors:

All training sessions are led by staff from the Maine Center for Disease Controls' Subsurface Wastewater Unit with assistance from other state agency personnel.

The program's sponsors prohibit discrimination in these programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status.

Additional Program Sponsors:

Androscoggin Valley S&WCD
Hancock County S&WCD
Cumberland County S&WCD
Franklin County S&WCD
Penobscot County S&WCD
Central Aroostook County S&WCD
Kennebec County S&WCD

Listen to your local radio station or watch WLBZ Channel 2, or WCSH Channel 6 for storm-related cancellation information.

Basic On-Site Wastewater System Installation

This session will be presented by Subsurface Wastewater Unit staff and will provide installers of subsurface wastewater disposal systems with a basic understanding of the design, permitting, construction, and inspection processes contained in the Maine Subsurface Wastewater Disposal Rules (CMR 241). The various types of systems recognized will be discussed, with significant time devoted to identification and explanation of rule sections that relate directly to the construction of subsurface systems. A detailed description of the inspection process will be featured, stressing system construction aspects that are critical to the successful long-term functioning of subsurface systems. The use of erosion control devices and the Dig Safe process will also be covered.

Attendees who submit HHE-200 forms for two successfully completed system installations will be granted a certification number. The details of the voluntary Certification Program for System Installers will be covered during this session.

- J1114 - Thursday, **February 10, 2011**
River Watch Hilton Garden, **Auburn**
- J1118 - Friday, **March 25, 2011**
University of Maine, **Orono**

New Local Plumbing Inspector

Newly certified Local Plumbing Inspectors, and people seeking certification, will receive a thorough explanation of the permitting, inspection, and enforcement provisions of the Subsurface Wastewater Disposal Rules (CMR 241). Staff from the Maine Center for Disease Control's Subsurface Wastewater Unit will lead the session, and will focus on the review of HHE-200 forms for permitting, the system inspection process, the enforcement procedure, recent rules changes, and relationship of the Local Plumbing Inspector to the client, Site Evaluator, System Installer, and the Department of Health and Human Services. The class will also feature a presentation on internal plumbing rules. While this session is open to all, including Site Evaluators and System Installers, it will primarily be of interest to Local Plumbing Inspectors.

- J1117 - Wednesday, **March 16, 2011**
State Fire Marshal's Training Room, **Augusta**

Advanced Septic System Training: Proprietary Device Workshop

This session will be introduced by Subsurface Wastewater Unit staff and will feature representatives from suppliers of proprietary devices relating to subsurface wastewater treatment and disposal. Each representative will describe their product and how its use can benefit the system user. Seven representatives will take part and have 45 minutes each to discuss their product and answer questions. Devices include concrete chambers, plastic chambers, fabric wrapped pipe, geotextile sand filters, and drip irrigation. These presentations will be more than sales talks and should be of interest to Local Plumbing Inspectors, Site Evaluators, and System Installers.

- J1115 - Thursday, **February 17, 2011**, Holiday Inn West, **Portland**
- J1116 - Tuesday, **March 8, 2011**, Jeff's Catering, **Brewer**

Subsurface Wastewater Disposal Rules: 2011 Revisions

A change in the rules means important changes for many in Maine, including Site Evaluators. In this class, participants will learn all that is necessary to know about the revised Subsurface Wastewater Disposal Rules (CMR 241). The Maine Center for Disease Control and Prevention's Subsurface Wastewater Unit began the revision process in December 2009, and after several meetings involving 16 stakeholder groups, the unit delivered the final product, which the state adopted earlier this year.

In this class, we will cover the rule development process and highlight the notable changes. The Subsurface Wastewater Disposal Rules include, for the first time, a "Key for Determining the Depth to Seasonal Groundwater Table". This table includes soil science terms and concepts that Site Evaluators must be familiar with and must use; this is especially true when making seasonal groundwater table and soils with an oxygenated groundwater table. (David Rocque, a soil scientist for the state, will be on hand to explain this new feature of the rules). The course will also examine the completely revised section in the rules on wetlands and water bodies. The section incorporates new setback requirements Site Evaluators must understand; the requirements were included to continue the DEP NRPA and Shoreland Zoning Permitting exemptions in the former rules.

- J1119 - Thursday, **April 7, 2011**, Holiday Inn West, **Portland**
- J1120 - Friday, **April 15, 2011**, State Fire Marshal's Training Room, **Augusta**
- J1121 - Thursday, **April 21, 2011**, Ellsworth City Hall, **Ellsworth**
- J1122 - Wednesday, **April 27, 2011**, The Granary Brew Pub, **Farmington**
- J1123 - Tuesday, **May 3, 2011**, No. Maine Community College, **Presque Isle**

CHECK THE DATE AND COURSE YOU WISH TO ATTEND.

Basic On-Site Wastewater System Installation

- Course # J1114 **February 10, 2011** in Auburn (Registration Deadline 1/27/2011)
- Course # J1118 **March 25, 2011** in Orono (Registration Deadline 3/11/2011)

New Local Plumbing Inspector

- Course # J1117 **March 16, 2011** in Augusta (Registration Deadline 3/2/2011)

Advanced Septic System Training: Proprietary Device Workshop

- Course # J1115 **February 17, 2011** in Portland (Registration Deadline 2/3/2011)
- Course # J1116 **March 8, 2011** in Brewer (Registration Deadline 2/22/11)

Subsurface Wastewater Disposal Rules: 2011 Revisions

- Course # J1119 **April 7, 2011** in Portland (Registration Deadline 3/24/2011)
- Course # J1120 **April 15, 2011** in Augusta (Registration Deadline 4/1/2011)
- Course # J1121 **April 21, 2011** in Ellsworth (Registration Deadline 4/7/2011)
- Course # J1122 **April 27, 2011** in Farmington (Registration Deadline 4/13/2011)
- Course # J1123 **May 3, 2011** in Presque Isle (Registration Deadline 4/19/2011)
