

I. Standard Cow's Milk-Based and Soy Formulas (Contract Brand Only)

Contract formulas include standard cow's milk and soy-based formulas produced by the manufacturer which holds the current Maine CDC WIC Nutrition Program formula contract. Currently, Mead Johnson provides the contract formula for the Maine CDC WIC Nutrition Program. ***The Maine CDC WIC Nutrition Program does not provide any non-contract standard cow's milk or soy based infant formulas.***

Health Care Provider prescription requests are not needed for issuance of standard formulas to infants 0-12 months of age. A prescription is needed for issuance of one of these formulas to children older than 12 months of age. Prescriptions must include:

- **specific formula name**
- **diagnosis**
- **length of time the product is needed**
- **amount of formula prescribed per day**

According to WIC Federal Regulations (7 CFR, Part 246), monthly formula issuance amounts are based on infant age, feeding choice (partially breastfed or fully formula fed) and form of formula (powder, concentrate, ready to feed). Partially breastfed infants needing supplemental formula may receive a maximum of one can of powdered formula in the first 30 days of life, and will have monthly issuance tailored according to individual need throughout the rest of the first year. WIC maximum formula issuance amounts for all infant age groups, feeding choices and forms of formula are included for each item listed.

Health care providers may use the ***Maine CDC WIC Nutrition Program/MaineCare Request/Prior Authorization for Medical Formula/WIC-Eligible Nutritionals*** form to obtain approval for issuance of standard cow's milk or soy formulas for children >12 months.

Contract Brand Standard Formulas													
Product Name	Description	Packaging	Composition	Indications	Maximum Monthly WIC Issuance Amounts								
Enfamil Newborn (Mead Johnson Nutrition™)	Milk based iron-fortified formula containing prebiotics designed for newborns to 3 months 80:20 whey:casein Contains no known sources of gluten	<u>Ready to Feed liquid:</u> 2 oz nursettes, 48 bottles/case NDC#: 00087-165741 <u>Powder:</u> 12.5 oz can, 6 cans/case Can yield: 90 fl. oz. (standard dilution) NDC#: 00087-510050	CHO: lactose, galactooligosaccharides, polydextrose PRO: whey protein concentrate, nonfat milk FAT: palm olein, soy, coconut, high-oleic sunflower <i>M. alpina</i> and <i>C. Cohnii</i> oils Vitamins/minerals 400 IU Vit D in 27 fl oz 20 cal/fl oz Osmolality= 300 mOsm/kg H ₂ O	Full-term newborns through 3 months of age	Non-breastfed infants	0-3 months	4-5 months	6-11 months
